To Win a Nuclear War Michio Kaku, Afterword by Axelrod, Daniel Axelrod, 1987 To Win a Nuclear War records as fully as we are likely to find what has gone on in the minds of American leaders and nuclear strategists on this awesome subject during these fateful forty years It is an appalling story This book compels us to re think and re write the history of the Cold War and the arms race From the foreword by Ramsey Clark former Attorney General of the United States To Win a Nuclear War provides a startling glimpse into secret U S plans to initiate a nuclear war from 1945 to the present Based on recently declassified Top Secret documents obtained through the Freedom of Information Act this book meticulously traces how U S policy makers in over a dozen episodes have threatened to initiate a nuclear attack The book also documents the surprising reasons why the war plans were never carried out and discloses the deeper hidden meaning of the Star Wars program

Thinking about America's Defense Glenn A. Kent, 2008 Lieutenant General Glenn A Kent was a uniquely acute analyst and developer of American defense policy in the second half of the twentieth century His 33 year career in the Air Force was followed by more than 20 years as one of the leading analysts at RAND This volume is not a memoir in the normal sense but rather a summary of the dozens of national security issues in which Glenn was personally engaged over the course of his career These issues included creating the single integrated operational plan SIOP leading DoD s official assessment of strategic defenses in the 1960s developing and analyzing strategic nuclear arms control agreements helping to bring new weapon systems to life and many others Each vignette describes the analytical frameworks and where appropriate the mathematical formulas and charts that Glenn developed and applied to gain insights into the issue at hand The author also relates his roles in much of the bureaucratic pulling and hauling that occurred as issues were addressed within the government publisher s website Bulletin of the Atomic Scientists ,1985-01 **Bulletin of the Atomic Scientists**

Cimbala,James Scouras,2002-05-30 Cimbala and Scouras examine the issues related to the control of nuclear weapons in the early 21st century These issues are both technical and policy oriented science and values are commingled This means that arguments about nuclear strategy arms control and proliferation are apt to be contentious and confusing The authors seek to provide readers with a fuller more accurate understanding of the issues involved They begin by analyzing the crazy mathematics of nuclear arms races and arms control that preoccupied analysts and policymakers during the Cold War After examining stability modeling they argue for a more comprehensive definition of strategic stability and they relate this more inclusive concept to the current relationship between the United States and Russia one characterized by cooperation as well as competition They then use the concept of friction to analyze how the gap between theory and practice might influence nuclear force operations and arms control The problem of nuclear weapons spread or proliferation is then considered from the vantage point of both theory and policy They conclude with an analysis of whether the United States might get by in the 21st century with fewer legs of its strategic nuclear triplet than weapons based on land at sea and airborne A provocative analysis for arms control policymakers strategists and students scholars and other researchers involved with nuclear weapons issues **Concurrent Resolution on the Budget for Fiscal Year ...** United States.
