*The First Team* John B Lundstrom, 2005-07-01 Hailed as one of the finest examples of aviation research this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier based air warfare From the earliest operations in the Pacific through the decisive Battle of Midway it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O Hare and their skilled VF squadron mates called the first team amassed a remarkable combat record in the face of desperate odds Tapping both American and Japanese sources historian John B Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations He writes from the viewpoint of the pilots themselves after interviewing some fifty airmen from each side to give readers intimate details of some of the most exciting aerial engagements of the war At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes After more than twenty years in print the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience *The First Team* John B.

*The Dark Path* Williamson Murray, 2024-10-22 From an esteemed military historian a sweeping history of the revolutions in war fighting that have shaped the modern world Heraclitus wrote that war is the father of all and it has formed much of the modern world Although the fundamental nature of war has not altered over the centuries constant change innovation and adaptation have repeatedly reshaped how wars are fought in the West Revolutions in military practice cannot be separated from larger social developments in areas like logistics finance and economics and the culture of military organizations In *The Dark Path* Williamson Murray argues that the history of warfare in the West hinged on five revolutions which both reflected the social political and economic conditions that produced them and in turn influenced how those conditions evolved These five key turning points are the advent of the modern state which formed bureaucracies and professional militaries the Industrial Revolution which produced the financial and industrial means to sustain and equip large armies the French Revolution which provided the ideological basis needed to sustain armies through continent sized wars the merging of the Industrial and French Revolutions in the U S Civil War and the accelerating integration of technological advancement financial capacity ideology and government that unleashed the modern capacity for total warfare An ambitious work of

synthesis this book shows how the world continually re creates war and how war in turn continually re creates the world
