First Training:

Armor, 2005 **School Development, Teacher Training, and Digital Learning Contexts** Hermann Astleitner, 2024
This book summarizes the results of a multimethod project on school development performed during the COVID 19 pandemic. It combines innovative theoretical approaches and findings as well as long term online research activities in which student assessments delivered the bases for adaptive teacher trainings. The theoretical foundations relate to sustainable conditions of classroom and school development, an approach to personality development and a focus on instructional coherence. Empirical findings concern the development of learning strategy use and classroom needs over time as well as a model for effective teacher education and related course evaluations. A further research area concerns advanced perspectives from digital learning research such as the effects of social media in classrooms, mixed and virtual learning materials, computer based collaborative learning and innovative interventions in media research. The book is aimed at researchers, teacher trainers, instructional designers and practitioners in the field of school development as well as teacher education. *The Engineer*, 2016 General He Yingqin Peter Worthing, 2016-03-29 A revisionist study of the career of General He Yingqin, one of the most prominent military officers in China's Nationalist period 1928-49 and one of the most misunderstood figures in twentieth century China. Western scholars have dismissed He Yingqin as corrupt and incompetent, yet the Chinese archives reveal that he demonstrated considerable success as a combat commander and military administrator during civil conflicts and the Sino Japanese War. His work in the Chinese Nationalist military served as the foundation of a close personal and professional relationship with Chiang Kai shek, with whom he worked closely for more than two decades. Against the backdrop of the Nationalist revolution of the 1920s through the 1940s, Peter Worthing analyzes He Yingqin's rise to power alongside Chiang Kai shek, his work in building the Nationalist military and his fundamental role in carrying out policies designed to overcome the regime's greatest obstacles during this turbulent period of Chinese history. *Deep Learning* Stephane Tuffery, 2022-11-14 DEEP LEARNING A concise and practical exploration of key topics and applications in data science.
