Emergence of Broadcasting in Britain Brian Hennessy, 2005 The Emergence of Broadcasting in Britain covers the development of radio from 1906-1932. It examines the people involved, their characters and their struggles. *Building Supply News*, 1929 Vols for 1979 include annual buyers guide. **The Fixers** Lindsay Palmer, 2019-07-01 News fixers are locally based media employees who serve as translators, coordinators and guides to foreign journalists in unfamiliar terrain. Operating in the shadows, fixers' contributions to journalism are largely hidden from us yet they underpin the entire international news industry. Almost every international news story we read today could not be produced without a fixer. Indeed, without fixers on the ground, skill and intimate knowledge of a territory, journalists would struggle to document stories unfolding in countries outside their own. Despite this, however, fixers remain one of the most under-protected and undervalued groups contributing to the production of news. Targeted by militant groups and governments, even by their neighbors, they must often engage in a precarious balancing act bridging the divides between foreign journalists and the people who live and work in fixers' own communities. In this book, Lindsay Palmer reveals the lives and struggle of those performing some of the most important work in international news. Drawing on interviews with 75 fixers around the world, Palmer is the first researcher to illuminate fixers' own rich narratives, offering a glimpse of how difficult it is to play the role of cultural mediator both in and out of conflict zones. A news fixer is not simply administrative; rather, the fixer's engagement with the story is editorial and more importantly, cultural. Each task that a fixer takes on is a creative effort at mediating between different lived experiences of race, ethnicity, gender, sexuality, religion, politics, community and nation. Ultimately, *The Fixers* offers a different picture of international reporting than most people are accustomed to seeing: one that is more collaborative, more contested and more fluid in its understanding of truth in a global, cross-cultural context. *Music News*, 1912

Information and Public Choice Roumeen Islam, 2008-06-06 The ability of the media to affect outcomes in economic and political markets has been well documented. News reporting and advertising influence consumer behavior in goods and services markets by revealing or selectively revealing information about a product, acting as agenda setters to influence consumer demand or enhancing competition in markets by alerting consumers to substitutes. In political markets, they can affect behavior by informing voters about a politician's views or actions, enlightening citizens to outcomes of public policy or taking a stance on political, social or economic issues. For businesses, households and most others, the media is the main source of information on public policy choices and current social and economic conditions. As a result, what news the media chooses to gather, analyze and disseminate and the slant they choose to put on what they report is of consequence. *Information and Public Choice* addresses the factors that affect the content and reach of news coverage as well as its impact on public policy. The book addresses both market constraints that affect media, particularly news content, and the impact that news reporting has on economic and political choices. The authors examine a range of issues including bias or slant in media reporting, the impact of markets and nonmarket factors on news reporting, and the role of government regulation of the media.

sector in developing countries The studies in this volume provide new evidence and a good summary of previous research on the power of the media An invaluable guide for those concerned about the impact of media on economic and political outcomes Information and Public Choice draws attention to an under researched yet important area of economics News in Public Memory Ingrid Volkmer,2006 News in Public Memory brings together a team of international experts to investigate the media transmitted history of the twentieth century as it exists in the memories and minds of people living in diverse cultures across the globe This book compares media related childhood memories across three generations in nine countries Results reveal that events of the past century are not only historical facts but have become substantial elements of a new global collective memory that has been integrated into generational identity worldwide The global approach of this research encourages the idea that the world is an interconnected whole but it also helps to advance a better understanding of the different perceptions of global and local news as they emerge from various cultural angles and geographical regions

Media Power in Hong Kong Charles Chi-wai Cheung,2016-02-12 Studies of Hong Kong media primarily examine whether China will crush Hong Kong s media freedom This book however traces the root problem of Hong Kong media back to the colonial era demonstrating that before the resumption of Chinese sovereignty there already existed a uniquely Hong Kong brand of hyper marketized and oligopolistic media system The system encouraged by the British colonial government was subsequently aggravated by the Chinese government This peculiar system is highly susceptible to state intervention and structurally disadvantaged dissent and marginal groups before and after 1997 The book stresses that this hyper marketized media system has been constantly challenged Through a historical study of media stigmatization of youth this book proposes that over the years various counter forces have penetrated the structurally lopsided Hong Kong media independent public popular and news media all make occasional subversive alliances to disrupt the mainstream and news media with a strong liberal professionalism provide the most subversive space for challenging cultural hegemony The book offers an alternative and fascinating account of the dynamics between hegemonic closure and day to day resistance in Hong Kong media in both the colonial and post colonial eras arguing that the Hong Kong case generates important insights for understanding ideological struggles in capitalist media *Theory of gontierism Vol 1* Darrell Gontier,2012-07-08 Darrells Theory of
