We Can't Go Home Again Clarence E. Walker,2001-06-14 Afrocentrism has been a controversial but popular movement in schools and universities across America as well as in black communities But in *We Can t Go Home Again* historian Clarence E Walker puts Afrocentrism to the acid test in a thoughtful passionate and often blisteringly funny analysis that melts away the pretensions of this therapeutic mythology As expounded by Molefi Kete Asante Yosef Ben Jochannan and others Afrocentrism encourages black Americans to discard their recent history with its inescapable white presence and to embrace instead an empowering vision of their African specifically Egyptian ancestors as the source of western civilization Walker marshals a phalanx of serious scholarship to rout these ideas He shows for instance that ancient Egyptian society was not black but a melange of ethnic groups and questions whether in any case the pharaonic regime offers a model for blacks today asking if everybody was a King who built the pyramids But for Walker Afrocentrism is more than simply bad history it substitutes a feel good myth of the past for an attempt to grapple with the problems that still confront blacks in a racist society The modern American black identity is the product of centuries of real history as Africans and their descendants created new hybrid cultures mixing many African ethnic influences with native and European elements Afrocentrism replaces this complex history with a dubious claim to distant glory Afrocentrism offers not an empowering understanding of black Americans past Walker concludes but a pastiche of alien traditions held together by simplistic fantasies More to the point this specious history denies to black Americans the dignity and power that springs from an honest understanding of their real history

Making it on Broken Promises Lee Jones,2023-07-03 This book provides an occasion to examine the complex conjuncture between the White supremacist realities of the American Academy and the often threatening presence of brilliant Black men in the Academy This challenging book should also serve as an inspiration for a new generation of Black men deeply devoted to the life of the mind in or outside the Academy From the foreward by Cornel West Sixteen of America s leading scholars offer an uncompromising critique of the academy from their perspective as African American men They challenge dominant majority assumptions about the culture of higher education most particularly its claims of openness to diversity and divergent traditions They take issue with the processes that determine what is legitimized as scholarship as well as with who wields the power to authenticate it They describe the debilitating pressures to subordinate Black identity to a supposedly universal but hegemonic Eurocentric culture They question the academy s valuing of individuality and its privileging of dichotomy over their cultural styles of community humanism and synthesis They also

range over such issues as culturally mediated styles of cognition the misuse of standardized testing the disproportionate burden of service placed on African American faculty and a reward system that discounts it

Faithful Account of the Race Stephen G. Hall, 2010-05-07 The civil rights and black power movements expanded popular awareness of the history and culture of African Americans But as Stephen Hall observes African American authors intellectuals ministers and abolitionists had been writing the history of the black experience since the 1800s With this book Hall recaptures and reconstructs a rich but largely overlooked tradition of historical writing by African Americans Hall charts the origins meanings methods evolution and maturation of African American historical writing from the period of the Early Republic to the twentieth century professionalization of the larger field of historical study He demonstrates how these works borrowed from and engaged with ideological and intellectual constructs from mainstream intellectual movements including the Enlightenment Romanticism Realism and Modernism Hall also explores the creation of discursive spaces that simultaneously reinforced and offered counter narratives to more mainstream historical discourse He sheds fresh light on the influence of the African diaspora on the development of historical study In so doing he provides a holistic portrait of African American history informed by developments within and outside the African American community

The History of Black Studies Abdul Alkalimat, 2021-10-20 A surge of African American enrolment and student activism brought Black Studies to many US campuses in the 1960s Sixty years later Black Studies programmes are taught at more than 1 300 universities worldwide This book is the first history of how that happened Black Studies founder and movement veteran Abdul Alkalimat offers a comprehensive history of the discipline that will become a key reference for generations to come Structured in three broadly chronological sections Black Studies as intellectual history as social movement and as academic profession the book demonstrates how Black people themselves established the field long before its institutionalisation in university programmes At its heart Black Studies is profoundly political Black Power the New Communist Movement the Black women s and students movements each step in the journey for Black liberation influenced and was influenced by this revolutionary discipline

The Other Black Church Joseph L. Tucker Edmonds, 2020-12-02 The Other Black Church Alternative Christian Movements and the Struggle for Black Freedom examines the movements led by Father Divine Charles Mason and Albert Cleage later known as Jaramogi Abebe Agyeman as alternative Christian movements in the middle of the twentieth century that radically re envisioned the limits and possibilities of Black citizenship These movements not only rethink the value and import of Christian texts and reimagined the role of the Black Christian prophetic tradition but they also outlined a new model of protest that challenged the language and logic of Black essentialism economic development and the role of the state By placing these movements in conversation with the long history of Black theology and Black religious studies this book suggests that alternative Christian movements are essential for thinking about African American critiques of and responses to the failures of U S based democracy These prophets of Black theological thought and their attention to the limits of the

state and traditional Black religious formations are most fully appreciated when studied in light of their conversations and interactions with other key Black prophetic and theological figures of the mid twentieth century Ultimately The Other Black Church will use those conversations and archives from these movements to highlight their protest of the racial state to explore the limits of the Black church and to argue for their continued significance for thinking about the variety and vibrancy of Black protest specifically Black religious protest during the twentieth century *John Henrik Clarke and the Power of Africana History* Ahati N. N. Toure, 2009 In the late 1960s through the late 1980s the late John Henrik Clarke 1915 1998 was one of the foremost architects of the emerging discipline of Africana Studies Africology as Professor of African World History in the Department of Black and Puerto Rican Studies at Hunter College of the City University of New York and as the Carter G Woodson Distinguished Visiting Professor of African History at Cornell University s Africana Studies and Research Center The study explores Clarke s development and conceptualization of Afrikan World History by examining his intellectual influences and training his approach to teaching Afrikan World History his notions regarding Publisher s website
