Exposure Assessment in Occupational and Environmental Epidemiology Mark J. Nieuwenhuijsen, 2003-08-07 Set against a background of growing public media and political concern about occupational and environmental health issues and a scientific need to better understand and explain the effects of pollutants on human health this book is a unique resource Contributions from an expert panel of international practitioners provide a comprehensive reference on the state of the art methods and applications in the field of occupational and environmental pollution and the adverse health effects particularly the exposure assessment in epidemiological studies Risks associated with occupational and environmental exposure are generally small but the exposed population and hence the population attributable risk may be large To detect small risk the exposure assessment needs to be very refined Exposure assessment is the study of the distribution and determinants of potentially hazardous agents and includes the estimation of intensity duration and frequency of exposure the variation in these indices and their determinants The aim of this book is to develop an understanding and knowledge of exposure assessment methods and their application to substantive issues in occupational and environmental epidemiology The emphasis is on methodological principles and good practice It is focused on exposure assessment in both occupational and environmental epidemiology since there are many similarities but also some interesting differences The book outlines the basic principles of exposure assessment and examines the current status and research questions in the exposure assessment of occupational and environmental epidemiological studies of allergens particulate matter chlorination

disinfection by products agricultural pesticides and radiofrequencies The book will be of interest to all concerned with exposure assessment and epidemiology It will be a valuable source for undergraduate and postgraduate courses in exposure assessment occupational hygiene environmental science epidemiology toxicology biostatistics occupational and environmental health health risk assessment and related disciplines and a useful resource of reference for policy makers and regulators

Lees' Loss Prevention in the Process Industries Frank Lees, 2005-01-25 Over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard reference work for chemical and process engineering safety professionals For years it has been the most complete collection of information on the theory practice design elements equipment regulations and laws covering the field of process safety An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field Sam Mannan is professor of chemical engineering at Texas A principles practice codes standards data and references needed by those practicing in the field
