Extended Atmospheres And Circumstellar Matter In Spectroscopic Binary Systems International Astronomical Union Symposium 51:

Extended Atmospheres and Circumstellar Matter in Spectroscopic Binary Systems A.H. Batten, 2012-12-06 The proposal to organize a Symposium on circumstellar matter and extended atmospheres in binary systems was first made by the Dominion Astrophysical Observatory to the Executive Committee of the International Astronomical Union in the summer of 1969. It received the support of the presidents of Commissions 29 Stellar Spectra, 30 Radial Velocities, 36 Stellar Atmospheres and 42 Photometric Double Stars. Approval in principle was given by the Executive Committee almost immediately and the Committee further suggested that the Symposium be officially designated the Struve Memorial Symposium. Final approval was given at the time of the 1970 General Assembly of the Union when the dates of the Symposium were set for August or September 1972. The Organizing Committee set up consisted of K O Wright, Chairman, A H Batten, K H B6hm, A A Boyarchuk, G Larsson, Leander and M Plavec. In addition, J Sahade and F B Wood acted as advisory members. Local organization was entrusted to a committee consisting of A H Batten, E K Lee and C D Scarfe. The final dates selected were September 6-12, 1972 and the Symposium was held at the Island Hall Hotel, Parksville, B C on Vancouver Island, some 90 miles from Victoria. The Organizing Committee attempted to arrange a Symposium of the type in which no contributed papers would be presented and discussion would range as widely as possible over the field covered by the six invited review papers.

Transactions of the International Astronomical Union: Reports on Astronomy C. de Jager, 2012-12-06

This volume contains the fifteenth tri-annual reports of the Presidents of the forty Commissions of the International Astronomical Union; it refers to the progress in our discipline during the three years 1970-1971 and 1972. As compared to earlier volumes a gradual change in character is unmistakable. The ever increasing flow of publications combined with the obvious necessity to keep the Reports at a reasonable size and price level has gradually forced the Commission Presidents to be more selective than before in drafting their Reports. I have certainly stimulated them into that direction in order that Reports like these be valuable and lasting; it seems imperative that the individual contributions have the character of a critical overall review where a fairly complete summary is given of the major developments and discoveries of the past three years and in which the broad developments and new trends be clearly outlined while at the same time essential problems for future research are identified. With respect to the latter item I have suggested the Commission Presidents to add to their reports a brief section on scientific priorities for future research in the field of their Commissions. In order to save space I have suggested to Commission Presidents that references to published papers are given on the basis of their number in the published issues of *Astronomy and Astrophysics Abstracts*. For instance the indication 06 078 019 or AAA 06 078.

Zdenek Kopal's Binary Star Legacy Horst Drechsel, Miloslav Zejda, 2005-08-01

An international conference entitled Zdenek Kopal's Binary Star Legacy was held on the occasion of the late Professor Kopal's 90th birthday in his home town of Litomyšl, Czech Republic and dedicated to the memory of one of the leading astronomers of the 20th century. Professor Kopal who devoted 60 years of his scientific life to the exploration of close binary systems initiated a breakthrough in this field with his description of binary components as non-spherical stars deformed by gravity with surfaces following Roche equipotentials. Such knowledge triggered the development of new branches of astrophysics dealing with the structure and evolution of close binaries and the interaction effects displayed by exciting objects such as cataclysmic variables, symbiotic stars or X-ray binaries. Contributions to this conference included praise of the achievements of a great astronomer and personal reminiscences brought forward by Kopal's former students and colleagues and reflected the state of the art of the dynamically evolving field of binary research which owes so much to the pioneering work of Zdenek Kopal.
