Extraordinary Bodies Figuring Physical Disability In American Culture And Literature:

Extraordinary Bodies Rosemarie Garland-Thomson, 1997 Inaugurates a new field of disability studies by framing disability as a minority discourse rather than a medical one The book examines disabled figures in Uncle Tom's Cabin and in African American novels by Toni Morrison and Audre Lorde as well as in the popular cultural ritual of the freak show

Extraordinary Bodies Rosemarie Garland Thomson, 2006 As the first major critical study to examine literary and cultural representations of physical disability Extraordinary Bodies situates disability as a social construction shifting it from a property of bodies to a product of cultural rules about what bodies should be or do Rosemarie Garland Thomson examines disabled figures in sentimental novels such as Harriet Beecher Stowe's Uncle Tom's Cabin and Rebecca Harding Davis's Life in the Iron Mills African American novels by Toni Morrison and Audre Lorde and the popular cultural ritual of the freak show Extraordinary Bodies inaugurates a new field of disability studies in the humanities by framing disability as a minority discourse rather than a medical one ultimately revising oppressive narratives of disability and revealing liberatory ones

Disability and the Environment in American Literature Matthew J. C. Cella, 2016-10-12 This book includes a collection of essays that explore the relationship between Disability Studies and literary ecocriticism particularly as this relationship plays out in American literature and culture The contributors to this collection operate from the premise that there is much to be gained for both fields by putting them in conversation and they do so in a variety of ways In this manner the collection contributes to what Joni Adamson and Scott Slovic have referred to as a third wave of ecocriticism Adamson and Slovic attribute the rise of this third wave to the richly diverse contributions to ecocriticism over the past decade by scholars intent on including postmodernism ecofeminism transnationalism globalization and postcolonialism into ecocritical discussions The essays in *Toward an Ecosomatic Paradigm* extend this approach of this third wave by analyzing disability from an environmental point of view while simultaneously examining the environmental imagination from a disability studies perspective More specifically the goal of the collection is to investigate the role that literary narratives play in fostering the ecosomatic paradigm As a theoretical framework the ecosomatic paradigm underscores the dynamic and inter relational process wherein human mind bodies interact with the places both built and wild

they inhabit That is the ecosomatic paradigm proceeds from the assumption that nature and culture are meshed in an ongoing and deep relationship that has implications for both the human subject and the natural world An ecosomatic approach highlights the profound overlap between embodiment and emplacement and is therefore enriched by both disability studies and ecocritical insight By drawing on points of confluence between disability studies and ecological criticism the various ecosomatic readings in this collection challenge normative even ableist constructions of the body environment dyad by complicating and expanding our understanding of this relationship as it is represented in American literature and culture Collectively the essays in this book augment the American environmental imagination by highlighting the relationship between disability and the environment as reflected in American literary texts across multiple periods and genres

Foster, 2022-06-30 The human body has been depicted in a variety of ways across a range of cultural and historical locations It has been described variously as a biological entity clothing for the soul a site of cultural production a psychosexual construct and a material encumbrance Each of these different approaches brings with it a range of anthropological political theological and psychological discourses that explore and construct identities and subject positions This Companion examines connections between American literature and bodies from the eighteenth century through the present It reveals the singular way that literature can help us understand the body s entanglement within social and biological influences and it traces the body s existence within histories of race gender and ability This volume details the genres critical fields and interpretive practices that best facilitate the analysis of bodies in the full span of American literary imaginings *Prosthetic Body Parts in Nineteenth-Century Literature and Culture* Ryan Sweet, 2021-12-03 This open access book investigates imaginaries of artificial limbs eyes hair and teeth in British and American literary and cultural sources from

the nineteenth and early twentieth century Prosthetic Body Parts in Nineteenth Century Literature and Culture shows how depictions of prostheses complicated the contemporary bodily status quo which increasingly demanded an appearance of physical wholeness Revealing how representations of the prostheticized body were inflected significantly by factors such as social class gender and age Prosthetic Body Parts in Nineteenth Century Literature and Culture argues that nineteenth century prosthesis narratives though presented in a predominantly ableist and sometimes disablist manner challenged the dominance of physical completeness as they questioned the logic of prostheticization or presented non normative subjects in threateningly powerful ways Considering texts by authors including Charles Dickens Edgar Allan Poe and Arthur Conan Doyle alongside various cultural medical and commercial materials this book provides an important reappraisal of historical attitudes to not only prostheses but also concepts of physical normalcy and difference
