Judicial Decision Making Lawrence Wrightsman, 1999-07-31 In the mid 1970s as a social psychologist dedicated to the application of knowledge I welcomed our field's emerging interest in the legal system I have always been fascinated by jury trials something about the idea that two conceptions of the truth were in irrevocable conflict and jurors could choose only one of them More important the criminal justice system is a major social force that has been ignored by social psychologists for most of the twentieth century As I systematically began to explore the applications of social psychological concepts to the law 20 years ago I experienced the delight of discovery similar to that of a child under a Christmas tree It has been satisfying to be among the cohort of researchers who have studied the legal system especially trial juries from a psychological perspective I believe we have learned much that would be useful if the system were to be revised If the system were to be revised there's the rub As I have stated my original motivation was the application of knowledge Like other social scientists I believed perhaps arrogantly that the results of our

research efforts could be used to make trial juries operate with more efficiency accuracy and satisfaction Over the last two decades much knowledge has accumulated How can we put this knowledge to work Judges are the gatekeepers of the legal system

The Psychology and Law of Criminal Justice Processes Roger J. R. Levesque, 2006

Psychological science now reveals much about the law's response to crime. This is the first text to bridge both fields as it presents psychological research and theory relevant to each phase of criminal justice processes. The materials are divided into three parts that follow a comprehensive introduction. The introduction analyses the major legal themes and values that guide criminal justice processes and points to the many psychological issues they raise. Part I examines how the legal system investigates and apprehends criminal suspects. Topics range from the identification, searching and seizing to the questioning of suspects. Part II focuses on how the legal system establishes guilt. To do so it centres on the process of bargaining and pleading, cases, assembling juries, providing expert witnesses and considering defendants' mental states. Part III focuses on the disposition of cases. Namely, that part highlights the process of sentencing defendants, predicting criminal tendencies, treating and controlling offenders and determining eligibility for such extreme punishments as the death penalty. The format seeks to give readers a feeling for the entire criminal justice process and for the role psychological science has and can play in it.

Handbook of Psychology and Law Dorothy K. Kagehiro, William S.
