Eyewitness Survival:

The Mighty Quake Pasquale De Marco, 2025-07-23 In the winter of 1811 a series of violent earthquakes shook the Mississippi Valley region of the United States forever changing the landscape and the lives of its inhabitants The New Madrid Earthquakes as they came to be known were among the most powerful earthquakes to ever hit North America causing widespread devastation and leaving an indelible mark on the region's history and culture This comprehensive book delves into the scientific historical and social impact of the New Madrid Earthquakes providing a detailed account of the events that unfolded during those fateful months Through a combination of vivid storytelling and meticulous research the book brings to life the experiences of those who lived through the earthquakes and explores the enduring legacy of this geological catastrophe With the help of maps illustrations and eyewitness accounts the book transports readers back to the epicenter of the earthquakes where they will witness firsthand the sheer force of nature and the resilience of the human spirit The book also examines the scientific advancements that emerged in the wake of the earthquakes as scientists struggled to understand the causes and effects of these powerful seismic events Beyond the scientific and historical narrative the book explores the social and economic consequences of the New Madrid Earthquakes The destruction of homes businesses and infrastructure had a profound impact on the lives of the people living in the affected areas The book delves into the challenges they faced in the aftermath of the earthquakes as well as the remarkable stories of their resilience and determination The *Mighty Quake* is a gripping account of one of the most significant natural disasters in American history It is a testament to the power of nature and the indomitable spirit of those who survived and rebuilt their lives in the face of adversity This book is an essential read for anyone interested in earthquakes natural disasters and the history of the American Midwest If you like this book write a review

to follow their dreams *Witnessing* Kelly Oliver, 2001-01-01 Challenging the fundamental tenet of the multicultural movement that social struggles turning upon race gender and sexuality are struggles for recognition this work offers a powerful critique of current conceptions of identity and subjectivity based on Hegelian notions of recognition The author's critical engagement with major texts of contemporary philosophy prepares the way for a highly original conception of ethics based on witnessing Central to this project is Oliver's contention that the demand for recognition is a symptom of the pathology of oppression that perpetuates subject object and same different hierarchies While theorists across the disciplines of the humanities and social sciences focus their research on multiculturalism around the struggle for recognition Oliver argues that the actual texts and survivors accounts from the aftermath of the Holocaust and slavery are testimonials to a pathos that is beyond recognition Oliver traces many of the problems with the recognition model of subjective identity to a particular notion of vision presupposed in theories of recognition and misrecognition Contesting the idea of an objectifying gaze she reformulates vision as a loving look that facilitates connection rather than necessitates alienation As an alternative Oliver develops a theory of witnessing subjectivity She suggests that the notion of witnessing with its double meaning as either eyewitness or bearing witness to the unseen is more promising than recognition for describing the onset and sustenance of subjectivity Subjectivity is born out of and sustained by the process of witnessing the possibility of address and response which puts ethical obligations at its heart **New Critical Thinking** Julian Wolfreys, 2017-06-02 Introduces advanced students of literature to the latest critical thinking Following a scene setting Introduction which reflects on the state of theory today the 11 chapters in this volume introduce new areas of critical thinking which go beyond the standard aims Literary Reading in a Digital Age Critical Making in the Digital Humanities Thing Theory Memory Work and Criticism Body Objects Technology Criticism and aThe Animal Multimodality and Linguistic Approaches to Literary Study Critical and Creative Practice Conditions for Success in the Writing Workshop Affect Theory Spectrality Critical Climate Change A final rounding off chapter on Historicising presents debates around historically oriented criticism including a round table among the contributors Each chapter also provides a critical case study of a text or texts including poetry writing guides a Seamus Heaney poem film adaptations of Jane Austen's *Pride and Prejudice* and Charlotte Brontë's *Jane Eyre* e readers and kindles First World War poetry and prose steampunk and Robert Macfarlane's *The Old Ways* From aThing Theory to animal theory multimodality to film adaptation and from acts of reading in a digital age to the creative writing workshop the volume reflects a radical reorientation in critical modes of thinking Key Features Presents cutting edge debates presented to more advanced students in an engaging yet sophisticated way Provides a wide range of case studies including poetry film reading devices popular fiction non fiction prose Reflects newly emerging ways of teaching critical ideas in the classroom Opens criticism to dialogue and possibility *The Last Stand of the Raven Clan* Gerald Easter, Mara Vorhees, 2024-10-29 A dynamic history of the Battle of Sitka that recognizes the vital importance of the Tlingit people their fight against Imperial Russia and how it

changed the fate of the North America If the long term plans of Peter the Great had been realized then California never would have become a Spanish colony asserted the head of the Russian American Company At the turn of the nineteenth century Russia was a rising power in North America The Tsar s empire extended across the Bering Sea through the Aleutians and Kodiak Island and down the Alaskan panhandle The objective of this imperialist project was to corner the lucrative North Pacific fur trade and colonize the American coastline all the way to San Francisco Bay The audacious scheme was moving apace until the Russians were finally confronted and stalled on the battlefield When Russia went to war in America the fate of a continent was at stake Yet it was neither the Old World rivals Spain and Britain nor the upstart United States who stopped Russian expansion but a coalition of defiant Tlingit tribes The Last Stand of the Raven Clan is the true story of how the indigenous Tlingit people of southeast Alaska thwarted Imperial Russia s grand plan of conquest in North America Leading the charge was the young war chief K aliy an as fierce and courageous as Crazy Horse or Geronimo The Tlingit stance against Russian colonization during the Battle of Sitka and beyond was arguably the most successful indigenous resistance against European imperialism in North America Tlingit oral histories and Russian eyewitness accounts bring this history to life shedding light on events both inspiring and infamous the Massacre at Refuge Rock one of Native America s worst atrocities the Survival March the perilous Tlingit retreat to avoid Russian capture and enslavement and the cutthroat competition between the U S and Russia to control the northern Pacific Ultimately The Last Stand of the Raven Clan chronicles the determined struggle for survival of the Tlingit people in their ancestral homeland and places the Battle of Sitka in its rightful spot as a key turning point in North American history

Perception E. Bruce Goldstein, 2010 Because of the ease with which we perceive many people see perception as something that just happens However even seemingly simple perceptual experiences involve complex underlying mechanisms which are often hidden from our conscious experience These mechanisms are being investigated by researchers and theorists in fields such as psychology cognitive science neuroscience computer science and philosophy A few examples of the questions posed by these investigations are What do infants perceive How does perception develop What do perceptual disorders reveal about normal functioning How can information from one sense such as hearing be affected by information from another sense such as vision How is the information from all of our senses combined to result in our perception of a coherent environment What are some practical outcomes of basic research in perception These are just a few of the questions this encyclopedia will consider as it presents a comprehensive overview of the field of perception for students researchers and professionals in psychology the cognitive sciences neuroscience and related medical disciplines such as neurology and ophthalmology

Writing History in the Medieval Islamic World Fozia Bora, 2019-06-13 In the encyclopaedic fourteenth century Arabic chronicles produced in Mamluk cities bore textual witness to both recent and bygone history including that of the Fatimids 969 1171CE For in two centuries of rule over Egypt and North Africa the Isma'ili Fatimids had left few self-generated historiographical records Instead it fell to Ayyubid and Mamluk historians to represent the dynasty to posterity This monograph sets out to explain how later historians preserved interpreted and reorganised earlier textual sources Mamluk historians engaged in a sophisticated archival practice within historiography rather than uncritically reproducing earlier reports In a new diplomatic edition translation and analysis of Mamluk historian Ibn al-Furat's account of late Fatimid rule in *The History of Dynasties and Kings* a widely known but barely copied universal chronicle of Islamic history Fozia Bora traces the survival of historiographical narratives from Fatimid Egypt Through Ibn al-Furat's text Bora demonstrates archivality as the heuristic key to Mamluk historical writing This book is essential for all scholars working on the written culture and history of the medieval Islamic world and paves the way for a more nuanced reading of pre-modern Arabic chronicles and of the epistemic environment in which they were produced

The Myth of an Afterlife Michael Martin, Keith Augustine, 2015-03-12 Because every single one of us will die most of us would like to know what if anything awaits us afterward not to mention the fate of lost loved ones Given the nearly universal vested interest in deciding this question in favor of an afterlife it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance But the evidence of our senses and the ever-gaining strength of scientific evidence strongly suggest otherwise In *The Myth of an Afterlife: The Case against Life after Death* Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong comprehensive and up-to-date casebook of the chief arguments against an afterlife Divided into four separate sections this collection opens with a broad overview of the issues as contributors consider the strongest evidence of whether or not we survive death in particular the

biological basis of all mental states and their grounding in brain activity that ceases to function at death Next contributors consider a host of conceptual and empirical difficulties that confront the various ways of surviving death from bodiless minds to bodily resurrection to any form of posthumous survival Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife heaven hell karmic rebirth and widely held ethical principles central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary The Myth of an Afterlife The Case against Life after Death brings together a variety of fields of research to make that case including cognitiveneuroscience philosophy of mind personal identity philosophy of religion moralphilosophy psychical research and anomalistic psychology As the definitive casebookof arguments against life after death this collection is required reading for anyinstructor researcher and student of philosophy religious studies or theology It is sure to raise provocative issues new to readers regardless of background from thosewho believe fervently in the reality of an afterlife to those who do not or are undecidedon the matter

Emergency Broadcasting and 1930s American Radio

Edward D. Miller, 2003 The voice we hear on the radio the voice with no body attached is a key element in the history of media in the twentieth century Before television and the internet there was radio and much of what defined the makeup of these newer media was influenced by the way radio was broadcast to people and the way people listened to it Emergency Broadcasting focuses on key moments in the history of early radio in order to come to an understanding of the role voice played in radio to describe national crises a fictional invasion from outer space and general entertainment Taking the Hindenburg disaster The War of the Worlds hoax Franklin Roosevelt's Fireside Chats and the serial mystery The Shadow as his focal points Edward Miller illustrates how the radio for the first time instantly communicated to a mass audience and how that communication where the voice counts more than the image is still at work today in television and the World Wide Web Theoretically sophisticated yet grounded in historical detail Emergency Broadcasting offers a unique examination of radio and at the same time develops a complex understanding of the media whose birth is owed to the innovations and disembodied power established by it Author note Edward D Miller is Chair of the Department of Media Culture at The College of Staten Island CUNY

Writing Life Writing Paul Eakin, 2020-07-02 Why do we endlessly tell the stories of our lives And why do others pay attention when we do The essays collected here address these questions focusing on three different but interrelated dimensions of life writing The first section Narrative argues that narrative is not only a literary form but also a social and cultural practice and finally a mode of cognition and an expression of our most basic physiology The next section Life Writing Historical Forms makes the case for the historical value of the subjectivity recorded in ego documents The essays in the final section Autobiography Now identify primary motives for engaging in self narration in an age characterized by digital media and quantum cosmology
