F-105 Thunderchief in Action David Doyle, 2016 The Republic F 105 Thunderchief was the largest single seat single engine combat aircraft to enter production It was conceived as a supersonic low altitude fighter bomber capable of delivering a heavy nuclear payload Although never used as intended the Thunderchief did see extensive combat The F 105 carried the brunt of the US bombing campaign during the early part of US involvement in Vietnam by completing more than 20 000 sorties Although serviced and flown by brave and competent men the extremely sophisticated Mach 2 capable F 105 or Thud as the type was nicknamed was ill suited for repetitive missions in humid Southeast Asia Maintenance requirements exceeded 100 man hours labor per flight hour Further combat losses rose to almost half of the 833 unit production total Ultimately the F 105 was withdrawn from the theater *F-105 Thunderchief in Action* Ken Neubeck, Don Greer, 2002

D. North Vietnam in February 1965 as the precursors to a regular albeit limited Rolling Thunder air program launched the following month Before proceeding with an account of Rolling Thunder its roots are traced in the events that compelled the United States to adopt an anti communist containment policy in Southeast Asia after the defeat of French forces by the communist Vietnamese in May 1954 **Air War, Southeast Asia, 1961-1973** Myron J. Striving for Air Superiority Craig C. Hannah, 2002 Annotation Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic air forces rarely has a state given equal weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command

SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities. Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs. Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War, recovered briefly over Korea, then slid into obsolescence during the 1950s. His explanation of why America's fighter aircraft did not work in Vietnam is instructive and unsettling. Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world. He side-steps politics and inter-service rivalries to focus on the nuts and bolts of tactical air power. The result is a factual, informative account of how an air force first loses its way, then finds its mission again.
