Environmental Issues and Waste Management Technologies in the Ceramic and Nuclear Industries IX John D. Vienna, Dane R. Spearing, 2012-04-05 In today's world of increasingly stringent environmental regulations it is critical to identify and adequately address environmental issues in the ceramic industry to ensure success. In addition, ceramics and glasses play a critical role in the nuclear industry. Nuclear fuels and waste forms for low level and high level radioactive mixed and hazardous wastes are primarily either ceramic or glass. Effective and responsible environmental stewardship is becoming increasingly more important in the world. These proceedings detail the results of the ongoing effort in these areas. Proceedings of the symposium held at the 105th Annual Meeting of The American Ceramic Society April 27-30 in Nashville Tennessee. Ceramic Transactions Volume 155 **Energy Research Abstracts**, 1993 *Failure Analysis of Brittle Materials, Volume 28* V. D. Frechette, 1990-09 Fractures are discussed theoretically and practically. This book represents a conscious effort on the part of the author to detail the life of a crack from its inception through its growth to its culmination. The author is careful to define all key terms within the text, making this book an excellent reference for anyone working with brittle materials. Proceedings, ... Annual Conference Canadian Nuclear Society. Conference, 1989 **The Science of Engineering Ceramics II** K. Niihara, Tohru Sekino, E. Yasuda, T. Among the topics discussed are problems arising from increasing air travel and airport congestion, the adequacy of water supplies, and waste treatment, the impact of new technologies on construction, urban real estate values, and the field of telematics, the combination of computers and telecommunications that makes money machines and national newspapers possible. **Flight-vehicle Materials, Structures, and Dynamics: Ceramics and ceramic-matrix composites**, 1992 Fusion Energy Update, 1986 **Materials Transactions, JIM.**, 1993-07 *Ceramic Abstracts*, 1998 *Nuclear Science Abstracts*, 1968 Keywords Index to U.S. Government Technical Reports, 1962 **Reactor Core Materials**, 1958
