Indigenous Agricultural Revolution Paul Richards, 2023-07-26 Originally published in 1985 this book argues forcefully and practically for new relationship between science and the small farmer It advocates scientific research seeking out changes which are already taking place within the smallholder farming sector and building on local initiatives Drawing on his experience of West Africa the author demonstrates that many of the most successful innovations in food crop production during the 20th century have indigenous roots and that there should therefore be less emphasis on teaching farmers how to farm and more emphasis on how to foster and support local adaptation and inventiveness This book will be of interest to students of agriculture environmental studies and rural development as well as those working with relief and development agencies

Critical Perspectives on Language and Discourse in the New World Order Faiz Sathi Abdullah, Mardziah Hayati Abdullah, Tan Bee Hoon, 2009-10-02 The papers in this book explore language use in a broad range of discourse fields They provide theoretical perspectives on global orientations to social political and economic transformations in the New World Order NWO and extend these with studies on

the impacts of such transformations at the local national regional and global levels The discussions highlight current concerns among academics and political commentators about the potential social impact of representations of the NWO in language and discourse The present work is important in raising social consciousness towards the central role that language and discourse play in the construction of shifting multiple identities In this way the roles of critical discourse analysis and indeed that of the analysts themselves are emancipative and socially transformative The value of such consciousness raising for potential social action in language user empowerment terms cannot be overstressed particularly given the ascendant position of the English language in the NWO This collection is a significant contribution to the ongoing critical discussion on global order discourse

A Degraded Caste of Society Andrew T.

Fede,2024-10-01 A Degraded Caste of Society traces the origins of twenty first century cases of interracial violence to the separate and unequal protection principles of the criminal law of enslavement in the southern United States Andrew T Fede explains how antebellum appellate court opinions and statutes when read in a context that includes newspaper articles and trial court and census records extended this doctrine to the South s free Black people consigning them to what South Carolina justice John Belton O Neall called a degraded caste of society in which they were in no respect on a perfect equality with the white man This written law either criminalized Black insolence or privileged private white interracial violence which became a badge of slavery that continued to influence the law in action contrary to the Constitution s mandate of equal protection of the criminal law The U S Supreme Court enabled this denial of equal justice as did Congress which did not make all private white racially motivated violence a crime until 2009 when it adopted the Matthew Shepard and James Byrd Jr Hate Crimes Prevention Act Fede s analysis supports that law s constitutionality under the Thirteenth Amendment while suggesting why during the Jim Crow era and beyond equal protection of the criminal law was not always realized and why the curse of interracial violence has been a lingering badge of slavery
