From Barrow To Boothia:

From Barrow to Boothia Peter Warren Dease, 2002 In 1835 the map of the Arctic coast of North America was still far from complete with unmapped gaps of 280km from Return Reef to Point Barrow in Alaska and 550km from Point Turnagain to Boothia Peninsula in the Central Canadian Arctic The Hudson's Bay Company developed a plan to fill the gaps and two of the Company's officers were chosen to carry it out the veteran Chief Factor Peter Dease efficient competent steady and with an excellent rapport with Indians and the servants mostly Métis and Thomas Simpson young energetic ambitious arrogant and cousin and secretary to George Simpson the Company's governor in North America Over a three year period from 1837 to 1839 operating from a base camp at Fort Confidence on Great Bear Lake the expedition achieved its goal Despite serious problems with sea ice Dease and Simpson in some of the longest small boat voyages in the history of the Arctic mapped the remaining gaps in a model operation of efficient economical and safe exploration Thomas Simpson's narrative the standard source on the expedition claimed the expedition's success for himself stating Dease is a worthy indolent illiterate soul and moves just as I give the impulse In *From Barrow to Boothia* William Barr shows that Dease's contribution was absolutely crucial to the expedition's success and makes Dease's sober sensible and modest account of the expedition available Dease's journal reproduced in full is supplemented by a brief introduction to each section and detailed annotations that clarify and elaborate the text By including relevant correspondence to and from expedition members Barr captures the original words of the participants offering insights into the character of both Dease and Simpson and making clear what really happened on this successful expedition

Barrow's Boys Fergus Fleming, 2007-12-01 From the author of *Ninety Degrees North* a spellbinding account of how officers of the British Navy explored the world after the Napoleonic Wars In 1816 John Barrow second secretary to the British admiralty launched the most ambitious program of exploration the world has ever seen For the next thirty years his handpicked teams of elite British naval officers scoured the globe from the Arctic to Antarctica their mission to fill the blanks that littered the atlases of the day *Barrow's Boys* is the spellbinding story of these adventurers the perils they faced including eating mice their shoes and even each other to survive and the challenges they overcame on their odysseys into the unknown Many of these expeditions are considered the greatest in history and here they've been collected into one volume that captures the full sweep of Barrow's program Here is all the adventure you could want stirring and generously told Anthony Brandt *National Geographic Adventure History* at its most romantic *The Columbus Dispatch* A sure bet for fans of Caroline Alexander's *The Endurance* this captivating survey of England's exploration during the nineteenth century illuminates a host of forgotten personalities *Publishers Weekly* Travel history of the best kind entertaining informed and opinionated *The Sunday Times*

John Rae, Arctic Explorer John Rae, 2022-09-01 John Rae is best known today as the first European to reveal the fate of the Franklin Expedition yet the range of Rae's accomplishments is much greater Over five expeditions Rae mapped some 1 550 miles 2 494 kilometres of Arctic coastline he is undoubtedly one of the Arctic's greatest

explorers yet today his significance is all but lost John Rae Arctic Explorer is an annotated version of Rae's unfinished autobiography William Barr has extended Rae's previously unpublished manuscript and completed his story based on Rae's reports and correspondence including reaction to his revelations about the Franklin Expedition Barr's meticulously researched long overdue presentation of Rae's life and legacy is an immensely valuable addition to the literature of Arctic exploration

Enlightened Zeal Theodore Binnema, 2014-03-21 *Enlightened Zeal* examines the fascinating history of the Hudson's Bay Company's involvement in scientific networks during the company's two hundred year chartered monopoly Working from the company's voluminous records Ted Binnema demonstrates the significance of science in the company's corporate strategies Initially highly secretive about all of its activities the HBC was by 1870 an exceptionally generous patron of science Aware of the ways that a commitment to scientific research could burnish its corporate reputation the company participated in intricate symbiotic networks that linked the HBC as a corporation with individuals and scientific organizations in England Scotland and the United States The pursuit of scientific knowledge could bring wealth and influence along with tribute fame and renown but science also brought less tangible benefits adventure health happiness male companionship self improvement or a sense of meaning The first study of scientific research in any chartered company over the entire course of its monopoly *Enlightened Zeal* expands our understanding of social networks in science establishes the vast scope of the HBC's contribution to public knowledge and will inspire new research into the history of science in other chartered monopolies

Arctic Labyrinth Glyn Williams, Sophia Costley, 2010-03 The elusive dream of locating the Northwest Passage an ocean route over the top of North America that promised a shortcut to the fabulous wealth of Asia obsessed explorers for centuries Until recently these channels were hopelessly choked by impassible ice Voyagers faced unimaginable horrors entire ships crushed mass starvation disabling frostbite even cannibalism in pursuit of a futile goal Glyn Williams charts the entire sweep of this extraordinary history from the tiny woefully equipped vessels of the first Tudor expeditions to the twentieth century ventures that finally opened the Passage

A Manual of Geography, Physical, Industrial and Political William Hughes (F.R.G.S.), 1852 *A Manual of European Geography, Etc. (A Manual of Geography. Part 2, Etc.)*. William HUGHES (F.R.G.S.), 1852

The Man Who Ate His Boots Anthony Brandt, 2011-03-22 After the triumphant end of the Napoleonic Wars in 1815 the British took it upon themselves to complete something they had been trying to do since the sixteenth century find the fabled Northwest Passage For the next thirty five years the British Admiralty sent out expedition after expedition to probe the ice bound waters of the Canadian Arctic in search of a route and then after 1845 to find Sir John Franklin the Royal Navy hero who led the last of these Admiralty expeditions Enthralling and often harrowing *The Man Who Ate His Boots* captures the glory and the folly of this ultimately tragic enterprise

Exploring Polar Frontiers William James Mills, 2003-12-11 Covers the entire history of Arctic and Antarctic exploration from the voyage of Pytheas ca 325 B C to the present in one convenient comprehensive reference resource *Exploring Polar Frontiers A Historical Encyclopedia* is the only

reference work that provides a comprehensive history of polar exploration from the ancient period through the present day. The author is a noted polar scholar and offers dramatic accounts of all major explorers and their expeditions together with separate exploration histories for specific islands, regions and uncharted waters. He presents a wealth of fascinating information under a variety of subject entries including methods of transport, myths, achievements and record breaking activities. By approaching polar exploration biographically, geographically and topically, Mills reveals a number of intriguing connections between the various explorers, their patrons and times and the process of discovery in all areas of the polar regions. Furthermore, he provides the reader with a clear understanding of the intellectual climate as well as the dominant social, economic and political forces surrounding each expedition. Readers will learn why the journeys were undertaken, not just where, when and how.

Continuation of the reference work that originated with Robert Dodsley, written and published each year which records and analyzes the year's major events, developments and trends in Great Britain and throughout the world. After 1815 the usual form became a number of chapters on Great Britain, paying particular attention to the proceedings of Parliament, followed by chapters covering other countries in turn, no longer limited to Europe. The expansion of the History came at the expense of the sketches, reviews and other essays so that the nineteenth century publication ceased to have the miscellaneous character of its eighteenth century forebear, although poems continued to be included until 1862 and a small number of official papers and other important texts continue to be reproduced.
