North Korea Ian Jeffries, 2013-06-17 There is much intense interest in North Korea at present This partly arises from questions about Korea s nuclear capability and intentions and about the extent to which North Korea may be viewed as a rogue state or part of the axis of evil In addition however North Korea has recently begun experimenting with reforms along Chinese lines The vigour with which these will be pursued and related questions about the degree of engagement or otherwise with South Korea are also important issues This book provides full details of economic and political developments in North Korea since 1989 when the communist world began to change irrevocably

Why Are Some Countries Richer Than Others? Jesus Felipe, 2008-10 Provides evidence of a problem with the influential testing and assessment of Solow s 1956 growth model proposed by Mankiw et al 1992 and a series of papers evaluating the latter First the assumption of a common rate of technical progress maintained by Mankiw et al 1992 is relaxed Solow s model is extended to include the different levels and rates of technical progress of each country This increases the explanatory power of the cross country variation in income capital of the OECD countries to over 80% The estimates of the parameters are statistically significant and take the expected values and signs Second the estimates merely reflect a statistical artifact This has serious implications for the possibility of actually testing Solow s growth model Illus
