From Exploitation To Altruism:

From Exploitation To Altruism Ian Steedman, 2019-03-04 Ricardo Marx Jevons and Wicksteed all feature prominently in the following twelve essays and indeed a number of other economists of the past from Cantillon onwards will be found to play a role Nevertheless these essays do not for the most part constitute history of thought for the genuine historian of thought they are rather attempts to broach more general issues via a tolerably close study of particular texts The first six essays concern issues in classical political economy particularly though not exclusively that of Ricardo and Marx The previously unpublished essay 7 provides a bridge to the second half of the volume discussing Wicksteed's first work in political economy his 1884 Jevonian critique of Marx and some of the debates which that work provoked Jevons and Wicksteed are also central to essays 8 10 The final three essays of which 10 and 11 were previously not readily available are all concerned with various aspects of preferences and of the complex motivations lying behind economic actions Are the following essays then to be classified as history of economic thought or as economic theory No they are not such classification would be futile What matters is whether or not they are honest in the rendering of other writers works accurate in reasoning and both stimulating and enjoyable to read

Neoclassical Economic Theory, 1870 to 1930 Klaus Hennings, Warren J. Samuels, 2012-12-06 Warren J Samuels Each book in this series explores the present status of its field in terms of where it is how it got there the existing tensions within the field and something of how the field might develop in the future Each book presumes that work in each field is neither settled nor unequivocal Each book attempts to comprehend its field as an evolving developmental process or set of efforts This particular book covering neoclassical economics is the third of three in the field of the History of Economic Thought The others are Pre Classical Economic Thought edited by S Todd Lowry and Classical Political Economy edited by William O Thweatt Each one conducts the same kind of analysis as the others in the series with the understanding that here we are dealing with the history of interpretation rather than a substantive body of analysis of a certain aspect of the economy for example labor or international trade That understanding must be complex and subtle inasmuch as revision of interpretation of earlier ideas is part of the process both cause and

consequence of re analyzing the economy In this group we are interested in how recent and contemporary writers have interpreted the history of economic thought differently both among themselves and from earlier writers 1 NEOCLASSICAL ECONOMIC THEORY 2 Several topics must be discussed to place such work in perspective in part as it is here applied to the history of the interpretation of neoclassical economics

Exploitative Contracts Rick Bigwood, 2003 Judges and scholars routinely use concepts such as exploitation in a justificatory way In the field of contract law a finding of exploitation may excuse a party from the normal consequences of his or her manifested contractual assent However the meaning of exploitation is usually assumed for this purpose rather than elaborated In fact exploitation is

a highly contested concept Exploitative Contracts examines the essentially contestable criteria of interpersonal exploitation claims It puts forward a conception of exploitation legal contractual exploitation a form of wrongdoing that arises in connection with the formation of contracts This notion is shown to underpin traditional heads of relief in contract law including unconscionable dealing undue influence unilateral mistake in equity and lawful act duress Importantly this notion of legal contractual exploitation conforms to the intellectual and institutional forms of order presupposed by the classic liberal conception of the contract The wrongfulness of an act of exploitation must reside in some characteristic of the processes of contract formation rather than in some quality of the impugned contract itself The doctrines of unconscionable dealing duress and undue influence are examined in detail in the light of what they each reveal about the process conception of legal contractual exploitation In turn the volume explains how an understanding of these contract law doctrines can be enhanced by a proper conception of exploitation
