**From Marx to Mao and Marchais** Dan Norman Jacobs,1979      *From Marx to Mao and Marchais* Dan Norman Jacobs,1979      Bourgeois Liberty and the Politics of Fear Marc Mulholland,2012-10-04 In 1842 Heinrich Heine the German poet wrote that the bourgeoisie obsessed by a nightmare apprehension of disaster and an instinctive dread of communism were driven against their better instincts into tolerating absolutist government Theirs was a politics motivated by fear Over the next 150 years the middle classes were repeatedly accused of betraying liberty for fear of red revolution The failure of the revolutions of 1848 conservative nationalism from the 1860s fascist victories in the first half of the twentieth century and repression of national liberation movements during the Cold War these fateful disasters were all explained by the bourgeoisie s fear of the masses For their part conservatives insisted that demagogues and fanatics exploited the desperation of the poor to subvert liberal revolutions leading to anarchy and tyranny Only evolutionary reform was enduring From the 1970s however liberal revolution revived on an unprecedented scale With the collapse of communism bourgeois liberty once again became a crusading force but now on a global scale In the twenty first century the armed forces of the United States Britain and NATO became instruments of regime change seeking to destroy dictatorship and build free market democracies President George W Bush called the invasion of Iraq in 2003 a watershed event in the global democratic revolution This was an extraordinary turn around with the middle classes now hailed as the truly universal class which in emancipating itself emancipates all society The debacle in Iraq and the Great Recession from 2008 revealed all too clearly that hubris still invited nemesis Bourgeois Liberty and the Politics of Fear examines this remarkable story and the fierce debates it occasioned It takes in a span from the seventeenth century to the twenty first covering a wide range of countries and thinkers Broad in its scope it presents a clear set of arguments that shed new light on the creation of our modern world      **Understanding**

**Australia's Neighbours** Nick Knight,2004-07-06 The East and Southeast Asian region is of immense economic strategic and cultural significance to Australia It has also been important in defining Australia s national identity and is the origin of many of Australia s immigrants Australians therefore need to have some understanding of their northern neighbours and to be able to think about them in an informed way They need to do so not only to be able to understand the region in which they live but also to better understand themselves This book facilitates this process by providing comparisons between Asian and Australian societies The reader is encouraged to think about Australia s neighbours across a wide range of social economic and historical contexts Written in an accessible and informative way this is a book for all Australians who seek a better understanding of Australia s neighbours in East and Southeast Asia      *Politics of Ideocracy* Jaroslaw Piekalkiewicz,Alfred Wayne Penn,1995-01-01 Explains why and how ideocratic and totalitarian governments emerge establish themselves evolve eventually collapse and disintegrate or transform themselves into new ideocracies      *Reading Sartre's Second Ethics* Elizabeth A. Bowman,Robert V. Stone,2023-03-27 In *Reading Sartre s Second Ethics* Elizabeth A Bowman and Robert V Stone

provide a comprehensive reconstructive and critical interpretation of Jean Paul Sartre's mature dialectical ethics. The key Sartrean texts are two posthumously published lectures: one delivered at the Gramsci Institute in Rome in 1964, the other scheduled to be delivered at Cornell University in 1965 but cancelled by Sartre in protest of U.S. foreign policy. Though different in content, method, and intended audience, Sartre gave both lectures the shared title *Morality and History*. As Bowman and Stone argue, these texts comprise a single systematic ethic in two parts. The Cornell lecture focuses primarily on a regressive and phenomenological analysis of normativity and its ambiguous place in lived moral experience; the Rome lecture focuses primarily on a progressive and dialectical synthesis of the ends or goals of historical conduct. Taken together, the two texts demonstrate that integral humanity is always possible because the means to it can always be freely invented.

This volume thoroughly examines the case for democratic market socialism in light of both the real world and intellectual history of socialism. James Yunker provides a clear and jargon-free account of this highly controversial issue. Covering the history of the market socialist idea from the precursors of Oskar Lange to the present, Yunker examines the subject not only in terms of formal economic theory but in the context of the actual history of communistic socialism as practiced in the U.S.S.R., Eastern Europe, the P.R.C., and elsewhere. The book's historical content and readability will make it of great interest not only to economists and historians of socialism but to any reader seeking to learn more about the place of market socialism in history and its potential for future application.    **Political Science** Neal Riemer, 1983    **The Bookseller**, 1979    **Bookseller**
