Research in Africa Dennis Ocholla,Omwoyo Bosire Onyancha,Aderonke Olaitan Adesina,2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa The book first explores the evolution and current state of information seeking behavior research demonstrating its importance in informing practice policy and design of information systems Despite the informal sector s substantial contributions to the national economy in Uganda there is a lack of studies delving into its information needs as well as an information gap in government NGOs and other stakeholders The book proposes that an appropriate information behavior model for information poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty infrastructure and illiteracy The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated and solutions for this problem are suggested including regular assessments of women entrepreneurs financial literacy skills and the introduction of training courses The role of academic libraries in universities library services for students with disabilities and accessibility of library services to students with disabilities is discussed and theoretical models for enhancing service in academic libraries are presented The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa **Perceptions of Knowledge Visualization: Explaining Concepts through Meaningful Images** Ursyn, Anna,2013-10-31 Multisensory perception is emerging as an important factor in shaping current lifestyles Therefore computer scientists engineers and technology experts are acknowledging the comparative power existing beyond visual explanations Perceptions of Knowledge Visualization Explaining Concepts through Meaningful Images discusses issues related to visualization of scientific concepts picturing processes and products as well as the role of computing in the advancement of visual literacy skills By connecting theory with practice this book gives researchers computer scientists and academics an active experience which enhances the perception and the role of computer graphics Information, Knowledge, Evolution and Self Wayne Talbot,2016-02-04 To understand this subject in relation to the overarching narrative of evolution one must first understand a simple scientific fact one that is generally hidden by imprecise language Material storage devices irrespective of whether they be synthetic or organic do NOT and CANNOT store information The same is to be said for communications of any form through any media I realise that this may be difficult to accept so let me explain Firstly the word information is the noun equivalent of the verb to inform and thus if a communication does not inform you it is not information to you It may be information to somebody else but that is irrelevant in the context of an individual s cognitive processing and knowledge In the context of evolution we must always consider the individual organism for that is where the mechanisms of evolution are said to occur before impacting a wider group This is not a science book in the accepted sense for I am not a scientist The target readership is people like myself well educated in a number of fields enthusiastic amateurs if you like but willing and able to see through the fog of technical language and

unsupported assertions to discern the truth for themselves Of course I would welcome readership amongst the scientific community but such people should understand that some of the rigorous norms of scientific publications are absent from this work
