Expressive Discourse:

Expressive Discourse Jeanette Harris, 1990 *The discursive role of adjectives in the translation of Metropolitan Anthony Bloom's religious texts* Mona-Ancuța IONESCU, 2023-01-01 The book examines the ways in which adjectives contribute to the realization of the various language functions in several of Metropolitan Anthony Bloom's 1914-2003 spirituality works and transcribed talks as well as in their Romanian translated versions. In particular, it aims at offering an application of the communication theory of Jakobson (1960, 1987, Kinneavy 1980) to Metropolitan Anthony's contemporary religious discourse and an investigation of the underlying lexical semantic and pragmatic relations carried out by the adjectival class in order for discourse aim to be achieved. It also seeks to reveal the role of adjectives in the process of translation from English into Romanian, more specifically in preserving the source text functions in the target language. To this end, the study engages in an analysis of the hierarchical communicative functions in the corpus as well as of the role played by adjectives both in the realization and transfer of the respective language functions. The present book, which may be of equal interest to researchers in linguistics and to theologians, demonstrates not only the pivotal role of adjectives in fulfilling communicative purposes specific to religious communication but also their cohesive discourse role in Metropolitan Anthony's legacy. At the same time, it highlights the outstanding status of the adjectival class in establishing the functional cognitive correspondence between the source text and the target text in translation. **Psychoanalysis and Discourse**

Patrick Mahony, 2003-09-02 After a detailed discussion of the significance of translation as a critical concept in psychoanalysis, Patrick Mahony proceeds to a comprehensive examination of free association, the cornerstone of the psychoanalytic method. Next follows the consideration of free association in its relation to scientific, rhetorical, expressive, and literary discourse. Mahony then begins a detailed study of certain aspects of the text of Freud's *Interpretation of Dreams* and of issues involved in the oral reporting of dreams. Attention is subsequently turned to the analysis of Freud's own writing in general and specifically to *Totem and Taboo*. Finally, the author shows how his ideas can illuminate literary classics by Villon, Shakespeare, Kafka, and Jonson, and the debate about whether there is anything specific to women's discourse. Inversion in Modern English Heidrun Dorgeloh, 1997-03-06 The book offers a comprehensive study of the different forms of subject verb and subject auxiliary inversion in Modern English declarative sentences It treats inversion as a speaker based decision for reordering within a fairly rigid word order system and identifies the meaning of the construction in terms of point of view and speaker subjectivity This semantic claim is tested against the occurrence as well as the absence of the different forms of inversion in natural discourse The analysis of the pragmatics and discourse function of inversion is based on the LOB and the Brown corpus and takes into account various textual relations British and American English written mode style text type genre The results suggest a strong affinity with the greater or lesser subjectivity of a text the construction is a marker of interpersonal meaning Provided the context is one of relative unexpectedness it additionally becomes a discourse marker which points to the limited value of quantitative corpus data in functional syntax

From Voice to Influence Danielle Allen, Jennifer S. Light, 2015-06-19 How have online protests like the recent outrage over the Komen Foundation's decision to defund Planned Parenthood changed the nature of political action How do Facebook and other popular social media platforms shape the conversation around current political issues The ways in which we gather information about current events and communicate it with others have been transformed

by the rapid rise of digital media The political is no longer confined to the institutional and electoral arenas and that has profound implications for how we understand citizenship and political participation With *From Voice to Influence* Danielle Allen and Jennifer S Light have brought together a stellar group of political and social theorists social scientists and media analysts to explore this transformation Threading through the contributions is the notion of egalitarian participatory democracy and among the topics discussed are immigration rights activism the participatory potential of hip hop culture and the porous boundary between public and private space on social media The opportunities presented for political efficacy through digital media to people who otherwise might not be easily heard also raise a host of questions about how to define good participation Does the ease with which one can now participate in online petitions or conversations about current events seduce some away from serious civic activities into slacktivism Drawing on a diverse body of theory from Hannah Arendt to Anthony Appiah *From Voice to Influence* offers a range of distinctive visions for a political ethics to guide citizens in a digitally connected world

Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

A Guide to Composition Pedagogies Gary Tate, Amy Rupiper-Taggart, Kurt Schick, Brooke Hessler, 2014-02 This is a bibliographic guide written for newcomers to the field The book familiarizes writing instructors with the current topography of composition studies and directs them to the best books and articles for further exploration

Grammar, Meaning and Pragmatics Frank Brisard, Jan-Ola Östman, Jef Verschueren, 2009-08-11 The ten volumes of *Handbook of Pragmatics* Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While other volumes select philosophical cognitive cultural

social variational interactional or discursive points of view this fifth volume looks at the field of linguistic pragmatics from a primarily grammatical angle That is it asks in which particular sense a variety of older and more recent functional rather than generative models of grammar relate to the study of language in use how this affects their general outlook on language structure whether issues of language use inform the very makeup of these models or are merely included as possible research themes and how far the actual integration of pragmatics ultimately goes is it a module layer or is the model truly usage based Each of the authors presenting these models has taken systematic care to highlight the relevant problems and focus on the implications of considering pragmatic phenomena from the point of view of grammar Furthermore a limited number of chapters deal with traditional topics in the grammatical literature and specifically those which are called pragmatic because they either are not strictly concerned with truth semantics or receive their truth value only from an interaction with context In the introduction these theories and topics are set up against the historical background of a gradually changing attitude on the part of grammarians towards questions of linguistic knowledge and behavior and the role of learning in their relationship

Critical Expressivism Tara Roeder, Roseanne Gatto, 2015-04-15 Critical Expressivism is an ambitious attempt to re appropriate intellectual territory that has more often been charted by its detractors than by its proponents Indeed as Peter Elbow observes in his contribution to this volume As far as I can tell the term expressivist was coined and used only by people who wanted a word for people they disapproved of and wanted to discredit The editors and contributors to this collection invite readers to join them in a new conversation one informed by a belief that the term expressivism continues to have a vitally important function in our field

A Theory of Spectral Rhetoric Seth Pierce, 2021-08-23 This book synthesizes Jacques Derrida's hauntology and spectrality with affect theory in order to create a rhetorical framework analyzing the felt absences and hauntings of written and oral texts The book opens with a history of hauntology spectrality and affect theory and how each of those ideas have been applied The book then moves into discussing the unique elements of the rhetorical framework known as the rhetorrectional situation Three case studies taken from the Christian tradition serve to demonstrate how spectral rhetoric works The first is fictional C S Lewis The Great Divorce The second is non fiction Tim Jennings The God Shaped Brain The final one is taken from homiletics Bishop Michael Curry's royal wedding 2018 sermon After the case studies conclusion offers the reader a summary and ideas future applications for spectral rhetoric
