*Oceanic Encounters* Margaret Jolly, Serge Tcherkézoff, Darrell Tryon, 2009-07-01 This volume the result of ongoing collaborations between Australian and French anthropologists historians and linguists explores encounters between Pacific peoples and foreigners during the longue durée of European exploration colonisation and settlement from the sixteenth century to the twentieth century It deploys the concept of encounter rather than the more common idea of first contact for several reasons Encounters with Europeans occurred in the context of extensive prior encounters and exchanges between Pacific peoples manifest in the distribution of languages and objects and in patterns of human settlement and movement The concept of encounter highlights the mutuality

in such meetings of bodies and minds whereby preconceptions from both sides were brought into confrontation dialogue mutual influence and ultimately mutual transformation It stresses not so much prior visions of strangers or others but the contingencies in events of encounter and how senses other than vision were crucial in shaping reciprocal appraisals But a stress on mutual meanings and interdependent agencies in such cross cultural encounters should not occlude the tumultuous misunderstandings political contests and extreme violence which also characterised Indigenous European interactions over this period

Adams,2020-07-27 This book develops a new and innovative way of understanding how language is used when people describe their spiritual and mystical encounters Early chapters provide overviews of the nature of spiritual encounters how commonly they occur and the role of language The book then develops a unique way of understanding the dynamics of talking about spirituality using original research to support this perspective In particular Peter J Adams explores how this characteristically vague way of speaking can be viewed as an intentional and not an incidental aspect of such communications because certain types of vagueness have the capacity to engage the imaginative participation of receptive listeners This expressive vagueness is achieved by embedding missing bits or gaps in the flow of what is described and these in turn provide sites for listeners to insert their own content Later chapters focus on practical
