Bluestein,2024 Featuring a wealth of high quality photographs this text describes clouds in a captivating and visual way The science behind why clouds form and the meteorological context in which the clouds appear is presented in a detailed yet straightforward approach accessible to any reader     *Historical Climate Variability and Impacts in North America* Lesley-Ann Dupigny-Giroux,Cary J. Mock,2009-09-18 Climatologists with an eye on the past have any number of sources for their work from personal diaries to weather station reports Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work Missing pieces of a climate puzzle can come from very far afield often in unlikely places In this book a series of case studies examine specific regions across North America using instrumental and documentary data from

the 17th to the 19th centuries Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail while the chapters also cover more widespread phenomena such as the collapse of the Low Country rice culture The book also looks at the role of weather station histories in complementing the instrumental record and sets out the methods that involve early instrumental and documentary climate data Finally the book s focus on North America reflects the fact that the historical climate community there has only grown relatively recently Up to now most such studies have focused on Europe and Asia The four sections begin with regional case studies and move on to reconstruct extreme events and parameters This is followed by the role of station history and lastly methodologies and other analyses The editors aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists They designed this book for use by general researchers as well as in upper level undergraduate or graduate level courses World Weather Extremes

Pauline Riordan,1994-12 Consists of a worldwide map of weather extremes and a separate map for the U S and Canada with comments on the reliability of the records shown Included are highest and lowest temperatures greatest snowfalls highest wind speeds high dew point and much more Records are taken from official sources and all are documented 2 maps
