Eye Of Narcissus:

Eye of Narcissus James Heppell-Hughes, 2003-09-01 *The Eye's Mind* Karen Jacobs, 2018-09-05 *The Eye's Mind* significantly alters our understanding of modernist literature by showing how changing visual discourses techniques and technologies affected the novels of that period In readings that bring philosophies of vision into dialogue with photography and film as well as the methods of observation used by the social sciences Karen Jacobs identifies distinctly modernist kinds of observers and visual relationships This important reconception of modernism draws upon American British and French literary and extra literary materials from the period 1900 1955 These texts share a sense of crisis about vision's capacity for violence and its inability to deliver reliable knowledge Jacobs looks closely at the ways in which historical understandings of race and gender inflected visual relations in the modernist novel She shows how modernist writers increasingly aware of the body behind the neutral lens of the observer used diverse strategies to displace embodiment onto those others historically perceived as cultural bodies in order to reimagine for themselves or their characters a purified gaze *The Eye's Mind* addresses works by such high modernists as Vladimir Nabokov Virginia Woolf and more distantly Ralph Ellison and Maurice Blanchot as well as those by Henry James Zora Neale Hurston and Nathanael West which have been tentatively placed in the modernist canon although they forgo the full blown experimental techniques often seen as synonymous with literary modernism Jacobs reframes fundamental debates about modernist aesthetic practices by demonstrating how much those practices are indebted to the changing visual cultures of the twentieth century **Roman Eyes** Jaś Elsner, 2021-12-07 In *Roman Eyes* Jas Elsner seeks to understand the multiple ways that art in ancient Rome formulated the very conditions for its own viewing and as a result was complicit in the construction of subjectivity in the Roman Empire Elsner draws upon a wide variety of visual material from sculpture and wall paintings to coins and terra cotta statuettes He examines the different contexts in which images were used from the religious to the voyeuristic from the domestic to the subversive He reads images alongside and against the rich literary tradition of the Greco Roman world including travel writing prose fiction satire poetry mythology and pilgrimage accounts The astonishing picture that emerges reveals the mindsets Romans had when they viewed art their preoccupations and theories their cultural biases and loosely held beliefs *Roman Eyes* is not a history of official public art the monumental sculptures arches and buildings we typically associate with ancient Rome and that tend to dominate the field Rather Elsner looks at smaller objects used or displayed in private settings and closed religious rituals including tapestries ivories altars jewelry and even silverware In many cases he focuses on works of art that no longer exist providing a rare window into the aesthetic and religious lives of the ancient Romans **Studies in Greek colour terminology. 2. Charopos** P G Maxwell Stuart, 1981 *Narcissus and Daffodil* Gordon R Hanks, 2002-04-18 *Narcissus and Daffodil* is the first book to provide a complete overview of the genus *Narcissus* Prized for centuries in western Europe as an ornamental plant it has recently attracted attention as a source of potentially valuable pharmaceuticals In eastern European

countries however Narcissus and other Amaryllidaceae have been valued as a source of perfume.

Australian Bird Names Ian Fraser, Jeannie Gray, 2019-09-02 This second edition of Australian Bird Names is a completely updated checklist of Australian birds and the meanings behind their common and scientific names which may be useful, useless or downright misleading. For each species the authors examine the many and varied common names and full scientific name with derivation, translation and a guide to pronunciation. Stories behind the name are included as well as relevant aspects of biology, conservation and history. Original descriptions translated by the authors have been sourced for many species. As well as being a book about names, this is a book about the history of the ever-developing understanding of birds, about the people who contributed to this understanding and most of all about the birds themselves. This second edition has been revised to follow current taxonomy and understanding of the relationships between families, genera and species. It contains new taxa, updated text and new vagrants and will be interesting reading for anyone with a love of birds, words or the history of Australian biology and bird watching.
