rewrite our approach to such important fields as psychology spirituality anthropology cultural studies art and literary theory ecology feminism and planetary transformation What would each of those fields look like if we wholeheartedly accepted the existence of not just body and mind but also soul and spirit In a stunning display of integrative embrace Wilber weaves these various fragments together into a coherent and compelling vision for the modern and postmodern world *Human Posture* John A. Schumacher,1989-10-01 Schumacher has written a provocative work in the philosophy of science In presenting posture as the most important aspect of life Schumacher examines how the terms of posture encompass all the major disciplines and provide a means for resolving human dilemmas through a humanistically oriented philosophy of inquiry He investigates a variety of important philosophical topics abstract thought perception time space sexuality education and community Insights into the origins and measures of space and time are especially valuable *Science Fiction: Ten Explorations* Colin N. Manlove,1986-06-18 *Fifty Key Figures in Science Fiction* Mark Bould,Andrew Butler,Adam Roberts,Sherryl Vint,2009-09-10 Fifty Key Figures in Science Fiction is a collection of engaging essays on some of the most significant figures who have shaped and defined the genre Diverse groups within the science fiction community are represented from novelists and film makers to comic book and television writers Important and influential names discussed include Octavia Butler George Lucas Robert Heinlein Gene Roddenberry Stan Lee Ursula K Le Guin H G Wells This outstanding reference guide charts the rich and varied landscape of science fiction and includes helpful and up to date lists of further reading at the end of each entry Available in an easy to use A Z format Fifty Key Figures in Science Fiction will be of interest to students of Literature Film Studies and Cultural Studies [The Psychoanalytic Ear and the Sociological Eye](#) Nancy Chodorow,2019-07-02 In *The Psychoanalytic Ear and the Sociological Eye* Toward an American Independent Tradition Nancy J Chodorow brings together her two professional identities psychoanalyst and sociologist as she also brings together and moves beyond two traditions within American psychoanalysis naming for the first time an American independent tradition The book s chapters move inward toward fine tuned discussions of the theory and epistemology of the American independent tradition which Chodorow locates originally in the writings of Erik Erikson and Hans Loewald and outward toward what Chodorow sees as a missing but necessary connection between psychoanalysis the social sciences and the social world Chodorow suggests that Hans Loewald and Erik Erikson self defined ego psychologists each brings in the intersubjective attending to the fine tuned interactions of mother and child analyst and patient and individual and social surround She calls them intersubjective ego psychologists for Chodorow the basic theory and clinical epistemology of the American independent tradition Chodorow describes intrinsic contradictions in psychoanalytic theory and practice that these authors and later American independents address and she points to similarities between the American and British independent traditions The American independent tradition especially through the writings of Erikson points the analyst and the scholar to individuality and society Moving back in time Chodorow suggests that from his earliest writings to his last

works Freud was interested in society and culture both as these are lived by individuals and as psychoanalysis can help us to understand the fundamental processes that create them Chodorow advocates for a return to these sociocultural interests for psychoanalysts At the same time she laments the lack of attention within the social sciences to the serious study of individuals and individuality and advocates for a field of individuology in the university
