Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters

1939 -1945 Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion. Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them. As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor. And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft. Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen. They proposed rotating wing ramjet fighters, arrowhead shaped ramjets, rocket firing bat winged gun platforms, sleek speed machines, tailless flying wings, tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors. **Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945** by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs, illustrations and period documentation from archives around the world.

Modern Methods for the Separation of Rarer Metal Ions Johann Korkisch, 2013-10-22 Modern Methods for the Separation of Rarer Metal Ions describes several separation methods of more than 50 elements. This book is divided into 19 chapters that include separation methods involving the actinide elements, rare earths and many rarer elements of the main and transition groups of the periodic table. The introductory chapter discusses the principles of the separation techniques presented in this book. The remaining chapters explore the application of specific separation methods such as ion exchange, chromatography, liquid liquid extraction, distillation and coprecipitation. The approach of each chapter is a presentation of separation principle of an element first followed by numerous examples of applications to the solution of practical problems encountered in separation chemistry. Chapters 2 and 3 examine the separations involving the actinides and rare earth elements using ion exchange and liquid liquid extraction. These are followed by chapters dealing with separations of other rarer elements which have been arranged according to their position in the periodic table. These elements are Li, Rb, Cs, Fr, Be, Ra, Ga, In, Tl, Ge, Ag, Au, Ti, Zr, Hf, V, Nb, Ta, Mo, W, Tc, Re and the platinum metals. This book will be of great use to analytical chemists.

Hayter,2025-09-04 Daniel W Hayter explores the concept of inaugurated resurrection within earliest Christianity the view that believers have experienced a present resurrection with Christ in

advance of their final resurrection at his return He argues that belief in inaugurated resurrection is already discernible in Paul s own writings in large part due to the influence of Scripture suggesting that the influence of Ezekiel 36 37 on Paul s understanding of the gift of the Spirit helps to explain this belief Paul saw inaugurated resurrection as a way of speaking of receiving the Spirit Hayter thus examines the reception of Ezekiel 36 37 in Second Temple Jewish literature in order to situate Paul s own understanding of these chapters in the wider Jewish context and follows with an extensive exploration of Ezekiel 36 37 in Paul s own writings He argues that Paul understood Ezekiel s vision of the resurrection of dry bones to have been fulfilled in the present in the gift of God s Spirit to those in Christ that Paul s understanding of Ezekiel is then brought to bear on a close exegesis of Romans 6 1 14 and that Paul s view of the Spirit in light of Ezekiel 36 37 helps to explain the strong connection between inaugurated resurrection and baptism Hayter concludes that far from being non bodily inaugurated resurrection by baptism in one Spirit implies incorporation into the resurrected body of Christ
