Massy, 2016-03-15 How can colleges and universities improve efficiency while preserving academic values Winner of the Typographic Jacket of the Washington Publishers Higher education expert William F Massy's decades as a professor senior university officer and consultant have left him with a passionate belief in the need for reform in America's traditional universities In *Reengineering*

the University he addresses widespread concerns that higher education's costs are too high learning falls short of objectives disruptive technology and education models are mounting serious challenges to traditional institutions and administrators and faculty are too often unwilling or unable to change An expert microeconomist Massy approaches the challenge of reform in a genuinely new way by applying rigorous economic principles informed by financial data and other evidence to explain the forces at work on universities and the flaws in the academic business model Ultimately he argues that computer models that draw on data from college transaction systems can help both administrators and faculty address problems of educational performance and cost analysis manage the complexity of planning and budgeting systems and monitor the progress of reform in nonintrusive and constructive ways Written for institutional leaders faculty board members and policymakers who bear responsibility for initiating and carrying through on reform in traditional colleges and universities Reengineering the University shows how working together administrators and faculty can improve education research and affordability by keeping a close eye on both academic values and the bottom line
