Rocket States: Atomic Weaponry and the Cultural Imagination Fabienne Collignon, 2014-07-31 *Rocket States* crosses the disciplines of Cold War Studies American Literature American Studies and Cultural Studies The particular attraction of this study lies in the combination of its range close textual and visual analysis of the correlations between land and weaponry set firmly within its political and cultural contexts with its unique analytical approach The book offers a synthesis between history theories of technology theories of space popular culture literary study and military science It illuminates a variety of literary texts from key writers and thinkers such as Pynchon Stephen King Norman Mailer and Tom Wolfe while also invoking figures like Nikola Tesla James Webb Batman and Ronald Reagan Organised topographically according to how missile technology manifests itself differently in particular locations *Rocket States* s geographical targets are Colorado Kansas Cape Canaveral and New York variously titled Excavation Preservation Evacuation and Transmission It advances through these states roughly chronologically beginning in the late 1940s and early 1950s and coming to an end in the first part of the 21st century Collignon s argument is concerned with identifying the recurring figures and fantasies of the Cold War the dome or parabola as sheltering techno form the fictions of total security adapting to constantly changing

targeting strategies gadget love closed freezing worlds As such Rocket States analyses by what processes the Cold War is frequently literalised in its weapons installations and how these facilities in turn shape dreams of containment survival escape and techno supremacy Textual Practice Terence Hawkes,2005-08-12 Textual Practice contains some of the most path breaking adventurous critical writing currently to be found in Britain Terry Eagleton Linacre College Oxford

Technics Improvised Timothy Murray,2022-02-22 Seeing new media art as an entry point for better understanding of technology and worldmaking futures In this challenging work a leading authority on new media art examines that curatorial and aesthetic landscape to explore how art resists and rewires the political and economic structures that govern technology How do inventive combinations of artistic and theoretical improvisation counter the extent to which media art remains at risk not just from the quarantines of a global pandemic but also from the very viral and material conditions of technology How does global media art speak back to the corporate closures of digital euphoria as clothed in strategies of digital surveillance ecological deprivation and planned obsolescence In Technics Improvised Timothy Murray asks these questions and more At the intersection of global media art curatorial practice tactical media and philosophy Murray reads a wide range of creative performances and critical texts that envelop artistic and digital materials in unstable political relations of touch body archive exhibition and technology From video to net art and interactive performance he considers both canonical and unheralded examples of activist technics that disturb the hegemony of biopolitical digital networks by staging the very touch of the unsettling discourse erupting from within In the process critical dialogues emerge between a wide range of artists and theorists from Hito Steyerl Ricardo Dominguez Joan Jonas Isaac Julien Ryoji Ikeda and Shadi Nazarian to Gilles Deleuze Jean Luc Nancy Elizabeth Povinelli Jean Fran ois Lyotard Erin Manning Achille Mbembe and Samuel Weber Brilliantly conceived and argued and eloquently written Technics Improvised points the way to how artistic and theoretical practice can seize on the improvisational accidents of technics to activate creativity thought and politics anew **Jacques Derrida (Routledge Revivals)** William Schultz,Lewis L.B. Fried,2016-06-17 First published in 1992 this book represents the first major attempt to compile a bibliography of Derrida s work and scholarship about his work It attempts to be comprehensive rather than selective listing primary and secondary works from the year of Derrida s Master s thesis in 1954 up until 1991 and is extensively annotated It arranges under article type a huge number of works from scholars across numerous fields reflecting the interdisciplinary and controversial nature of Deconstruction The substantial introduction and annotations also make this bibliography in part a critical guide and as such will make a highly useful reference tool for those studying his philosophy

Derrida and the Future of Literature Joseph G. Kronick,1999-09-30 Confirms the importance of literature in Derrida s development of a postmodern ethics *The Ethics of Criticism* Tobin Siebers,2018-03-15 Tobin Siebers asserts that literary criticism is essentially a form of ethics The Ethics of Criticism investigates the moral character of contemporary literary theory assessing a wide range of theoretical approaches in terms of both the ethical presuppositions underlying the critical

claims and the attitudes fostered by the approaches Building on analyses of the moral legacies of Plato Kant Nietzsche and Freud Siebers identifies the various fronts on which the concerns of critical theory impinge on those of ethics **Against Apocalypse** Fred Dallmayr, 2015-12-24 The book denounces the irresponsible recklessness of some geopolitical agendas which are pushing the world relentlessly toward a major global war and possibly toward nuclear destruction or apocalypse The Bulletin of Atomic Scientists has recently placed the Doomsday Clock at three minutes to midnight Signs pointing toward a possible grand disaster are multiple everywhere one looks in our world today one finds ethnic and religious conflicts bloody mayhem incipient genocide proxy wars and hybrid wars renewal of the Cold War Add to these ills global economic crises massive streams of refugees and the threats posed by global warming and the picture of a world in complete disorder is complete Thus it is high time for humankind to wake up Starting from the portrayal of global anomie the book issues a call to people everywhere to oppose the rush to destruction and to return to political sanity and the quest for peace This is a call to global public responsibility In ethical terms it says that people everywhere have an obligation to prevent apocalypse and to maintain our world or hold the world together in all its dimensions including the dimensions of human and social life natural ecology and human spiritual aspirations or openness to the divine Differently out in lieu of the prevailing disorder and brokenness the book urges us to search for a new wholeness and just peace The book is intercultural and also interdisciplinary Since the aim is holistic to hold the world together the book necessarily has to draw on many disciplines including philosophy theology social science history and literature In terms of Western philosophical and intellectual legacies it draws mainly on the teachings of Nietzsche Heidegger and Derrida It also offers a completely new interpretation of the work of Thomas Hobbes unearthing in this work an ethical demand to exit from the state of perpetual warfare in the direction of a shared commonwealth The text also relies on the teachings of Christian theology both Catholic and Protestant invoking at crucial junctures the works of Karl Barth Raimon Panikkar and others In terms of non Western intellectual and spiritual legacies the book offers new interpretations of leading texts in the Indian and Chinese traditions Thus emphasis is placed on the ideas of world maintenance loka samgraha in Hinduism and of All Under Heaven in classical Chinese thought Although a central thrust of the text is for a new wholeness the goal is not a uniform synthesis where everything would be swallowed up in a bland unity Rather the issue is how to preserve diversity of the world in its rightful integrity by linking all elements in a complex web of interconnections and relationality **Anthropology in the Age of Technology** Paul van Dijk, 2022-05-16 This book is the first to discuss for an English speaking audience the ideas of the German Jewish man of letters thinker and activist G nther Anders Anders is one of few philosophers to deal intensely with the moral consequences of Auschwitz and Hiroshima He can rightly be called the philosopher of the atomic age and his thinking a philosophy of modern technology In biting manifestoes sharp aphorisms and penetrating essays in stirring diary notes and political fables Anders strikes out the age in which we live As a twentieth century visionary he exposes the absence of the moral and social

imaginations that is necessary to prevent our history from ending in a total catastrophe In the gap between our technical creations and our utter inability to imagine their destructive potential lies the basis for the unstoppable activity of this practical philosopher From every possible angle he attempts to comprehend this modern schizophrenia in its roots and consequences Anders is one of the most important thinkers of the twentieth century He tried to describe and analyze the variety of manifestations of the self destructive progress of our technical civilization which makes humanity into an antiquated sort He diagnosed countless important problems ranging from the world of media to the dictates of the world of machinery and he investigated their social political and philosophical meaning To read his writings is more than becoming acquainted with a rich and colorful philosopher It is more than an encounter with a moving and passionate individual It is ultimately a confrontation with oneself with our own guilt and responsibility with our personal hopes and fears with our lack of imagination and with our need to recover it

Monsters, Mushroom Clouds, and the Cold War M. Keith Booker, 2001-05-30 The 1950s are widely regarded as the golden age of American science fiction This book surveys a wide range of major science fiction novels and films from the long 1950s the period from 1946 to 1964 when the tensions of the Cold War were at their peak The American science fiction novels and films of this period clearly reflect Cold War anxieties and tensions through their focus on such themes as alien invasion and nuclear holocaust In this sense they resemble the observations of social and cultural critics during the same period Meanwhile American science fiction of the long 1950s also engages its historical and political contexts through an interrogation of phenomena such as alienation and routinization that can be seen as consequences of the development of American capitalism during this period This economic trend is part of the rise of the global phenomenon that Marxist theorists have called late capitalism Thus American science fiction during this period reflects the rise of late capitalism and participates in the beginnings of postmodernism described by Frederic Jameson as the cultural logic of late capitalism
