**Morality** Lyndon H. LaRouche, Jr., Scientific and technological progress as such are indispensable for the continued progress of the entirety of our species However when and whether progress or even retrogression occurs is never automatic the actual outcome is a result of what we term cultural factors as much as impulses attributable to progress in discovery of higher physical principles as such *The Urban Fantastic in Nineteenth-Century European Literature* Patricia García,2022-01-17 The Urban Fantastic in Nineteenth Century European Literature explores transnational perspectives of modern city life in Europe by engaging with the fantastic tropes and metaphors used by writers of short fiction Focusing on the literary city and literary representations of urban experience throughout the nineteenth century the works discussed incorporate supernatural occurrences in a European city and the supernatural of these stories stems from and belongs to the city The argument is structured around three primary themes Architectures Encounters and Rhythms make reference to three axes of city life material space human encounters and movement This thematic approach highlights cultural continuities and thus supports the use of the label of urban fantastic within and across the European traditions studied here

**Universal History and the Making of the Global** Hall Bjørnstad, Helge Jordheim, Anne Régent-Susini, 2018-07-03 By examining the history of universal history from the late Middle Ages until the early nineteenth century we trace the making of the global Early modern universal history can be seen as a response to the epistemological crisis provoked by new knowledge and experience Traditional narratives were no longer sufficient to gain an understanding of events Inspired by recent developments in theory of history the volume argues that the relevance of universal history resides in the laboratory of intense diverse and mainly unsuccessful attempts at thinking history and universals together They all shared the common aim of integrating all time and space assemble the world and keep it together **New Waves in Aesthetics** K. Stock, K.

Thomson-Jones, 2008-08-01 Leading young scholars present a collection of wide ranging essays covering central problems in meta aesthetics and aesthetic issues in the philosophy of mind as well as offering analyses of key aesthetic concepts new perspectives on the history of aesthetics and specialized treatment of individual art forms *Germany's Conscience* Reinbert Krol, 2021-06-09 Questions of truth ethics state power and propaganda of how to render account of catastrophes and reconcile oneself with one's past are not only crucial to our time they were also central to the German historian Friedrich Meinecke 1862 1954 Probably no generation of historians before Meinecke had lived through more unsettling transformations during which these questions were most pressing Reinbert Krol's analysis of Meinecke's intellectual development does not only give us insight into his philosophy of history which turns out to be more conciliatory than previously assumed it can also be a source of inspiration for scholars of history today The Marriage of Aesthetics and Ethics Stéphane Symons, 2015-08-25 In The Marriage of Aesthetics and Ethics fifteen authors reflect on the nature of friendship and love and on the complex relation between art and morality Karl Verstrynge Vincent Caudron Anne Christine

**The Design of the University** Heinz-Dieter Meyer, 2016-10-04 What is the reason for the American university's global preeminence How did the American university succeed where the development of the German university from which it took so much stalled In this closely argued book Meyer suggests that the key to the American university's success is its institutional design of self government Where other university systems are dependent on the patronage of state church or market the American university is the first to achieve true autonomy which it attained through an intricate system of engagements with societal actors and institutions that simultaneously act as amplifiers of its impact and as checks on the university's ever present corrosive tendencies Built on a searching analysis of the design thinking of Wilhelm von Humboldt and Adam Smith and closely tracing the learning process by which Americans adapted the German model The Design of the University dismisses efforts to copy superficial features of the American university in order to achieve world class rank Calling attention to the design details of the university and the particulars of its institutional environment this volume identifies the practices and choices that produced the gold standard for today's world class higher education

*Circulating Queerness* Natasha Hurley, 2018-06-19 A new history of the queer novel shows its role in constructing gay and lesbian lives The gay and lesbian novel has long been a distinct literary genre with its own awards shelving categories bookstore spaces and book reviews But very little has been said about the remarkable history of its emergence in American literature particularly the ways in which the novel about homosexuality did not just reflect but actively produced queer life Drawing on Mikhail Bakhtin's insight that the history of society is connected to the history of language author Natasha Hurley charts the messy complex movement by which the queer novel produced the very frames that made it legible as a distinct literature and central to the imagination of queer worlds Her vision of the queer novel's development revolves around the bold argument that literary circulation is the key ingredient that has made the gay and lesbian novel and its queer forebears available to its audiences Challenging the narrative that the gay and lesbian novel came into view in response to the emergence of homosexuality as a concept Hurley posits a much longer history of this novelistic genre In so doing she revises our understanding of the history of sexuality as well as of the processes of producing new concepts and the evolution of new categories of language

**Changing European Visions of Disaster and Development** Vanessa Pupavac, Mladen Pupavac, 2020-09-02 Goethe's 1832 poem Faust offers a vision of humanity realising freedom and prosperity through transcending natural adversity Changing European Visions of Disaster and Development returns to Faust as a way of

exploring the rise and fall of European humanist aspirations to build free and prosperous national political communities protected from natural disasters Faust stories emerged in early modern Europe linked to the shaking of the traditional religious and political order and the pursuit of new areas of human knowledge and activity which led to a shift from viewing disasters as acts of God to acts of nature Faust's dam building and land reclamation project in Goethe's poem was inspired by Dutch hydro engineering and in turn inspired others Faustian dreams of an engineered future were pursued by the American Yugoslav inventor Nikola Tesla and the country of his birth towards establishing its national independence and escaping the fate of being a borderland Faust remains a compelling reference point to explore European visions of disaster and development If Faust captured the European spirit of earlier centuries what is today's outlook Ambitious Faustian development visions to eradicate natural disasters have been replaced by anti Faustian risk cosmopolitanism sceptical towards human activity in ways counter to building collective protection from disaster Tesla's country of birth fears returning to being an insecure borderland of Europe This powerful and timely book calls for a rekindling of European humanism and Faust's vision of free people standing on free land

**Making an Entrance** Juliane Vogel, 2022-10-03 How does the entrance of a character on the tragic stage affect their visibility and presence Beginning with the court culture of the seventeenth century and ending with Nietzsche's Dionysian theater this monograph explores specific modes of entering the stage and the conditions that make them successful or cause them to fail The study argues that tragic entrances ultimately always remain incomplete that the step figures take into visibility invariably remains precarious Through close readings of texts by Racine Goethe and Kleist among others it shows that entrances promise both triumph and tragic exposure though they appear to be expressions of sovereignty they are always simultaneously threatened by failure or annihilation With this analysis the book thus opens up possibilities for a new theory of dramatic form one that begins not with the plot itself but with the stage entrance that structures how characters appear and thus determines how the plot advances By reflecting on acts of entering this book addresses not only scholars of literature theater media and art but anyone concerned with what it means to appear and be present

Patricia Anne Simpson, 2025-03-18 *German Empires and Decolonial Fantasies 1492 1942* investigates the ways German speaking Europe's cultural narratives reflect histories of entanglement with the colonial world Drawing from an impressive range of sources Patricia Anne Simpson decodes the ironclad colonial logic that reproduces and inflects tropes of the conquistador scientific explorer and pioneers She brings them into dialogue with a cast of historical agents who reimagine the cannibal the enslaved the conquered Indigenous interlocutors and the ungovernable Throughout intersectional attributes of race gender ethnicity and religion reconfigure around shades of European whiteness Individual chapters explore the Hohenzollern legacy in early modernity debates about sovereignty and enslavement recruitment literature prose and fiction about migration and colonization in Africa and the Americas and colonial memoirs driven by recolonial fantasies after 1918 *German Empires and Decolonial Fantasies* advances efforts to decolonize the multiple disciplines that intersect the field of German studies including literary criticism history philosophy art history and anthropology *German Empires and Decolonial Fantasies 1492 1942* draws from a wide range of sources from a seventeenth century Brandenburg fort on the coast of Ghana to a novella about a beleaguered colonial administrator in German East Africa to advance an interdisciplinary discourse at

the nexus of colonial narratives and national imaginaries Through detailed case studies Simpson argues for the inclusion of voices that pushed back against imperialist expansion or intervention as well as those historical actors who disputed the supremacy of whiteness and the persuasive power of German centric national history
