From Bauhaus to Our House Tom Wolfe, Heberto Padilla, 1981 The strange saga of American architecture in the 20th century makes for both comedy and intellectual excitement as Wolfe debunks the Euro gods of modern and postmodern architecture and their American counterparts

From Bauhaus to Our House Tom Wolfe, 2025-02-04 Wolfe takes European architects and Bauhaus art school founder Walter Gropius to task for their glass and steel box buildings which have influenced American cities

The Postmodernist Turn J. David Hoeveler, 2004 During the 1970s the United States became the world's preeminent postindustrial society The new conditions changed the way Americans lived and worked and even their perceptions of reality Americans struggled to find their place in a world where symbol became more important than fact appearance more important than reality where image supplanted essence In this reassessment of a little studied decade J David Hoeveler Jr finds that the sense of detachment and dislocation that characterizes the postindustrial society serves as a paradigm for American thought and culture in the 1970s The book examines major developments in literary theory philosophy architecture and painting as expressions of a 1970s consciousness Hoeveler also explores the rival political readings of these subjects and considers the postmodernist phenomenon as it became an ideological battleground in the decade Clear and engaging the work will be of great interest to historians theorists and everyone who wants to further explore the 1970s

The Theory of Architecture Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas

covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this

The Geography of Hope Chris Turner,2010-04-30 After the fierce warnings and grim predictions of *The Weather Makers* and *An Inconvenient Truth* acclaimed journalist and national bestselling author Chris Turner finds hope in the search for a sustainable future Point of no return The chilling phrase has become the ubiquitous mantra of ecological doomsayers a troubling headline above stories of melting permafrost and receding ice caps visions of catastrophe and fears of a problem with no solution Daring to step beyond the rhetoric of panic and despair *The Geography of Hope* points to the bright light at the end of this very dark tunnel With a mix of front line reporting analysis and passionate argument Chris Turner pieces together the glimmers of optimism amid the gloom and the solutions already at work around the world from Canada s largest wind farm to Asia s greenest building and Europe s most eco friendly communities But *The Geography of Hope* goes far beyond mere technology Turner seeks out the next generation of political economic social and spiritual institutions that could provide the global foundations for a sustainable future from the green hills of northern Thailand to the parliament houses of Scandinavia from the villages of southern India where microcredit finance has remade the social fabric to America s most forward thinking think tanks In this compelling first person exploration punctuated by the wonder and angst of a writer discovering the world s beacons of possibility Chris Turner pieces together a dazzling map of

the disparate landmarks in a geography of hope While most of the world has been spinning in stagnant circles of recrimination and debate on the subject of climate change paralyzed by visions of apocalypse both natural if nothing of our way of life changes and economic if too much does Denmark has simply marched off with steadfast resolve into the sustainable future reaching the zenith of its pioneering trek on the island of Sams And so if there s an encircled star on this patchwork map indicating hope s modest capital then it should be properly placed on this island Perhaps for the sake of precision at the geographic centre of J rgen Tranberg s dairy farm There are I m sure any number of images called to mind by talk of ecological revolution and renewable energy and sustainable living but I m pretty certain they don t generally include a hearty fiftysomething Dane in rubber boots spotted with mud and cow shit Which is why Sams s transformation is not just revolutionary but inspiring not just a huge change but a tantalizingly attainable one And it was a change that seemed at its most workaday near effortless no more remarkable than the cool October wind gusting across the island down on Tranberg s farm from *The Geography of Hope* *God and Enchantment of Place* David Brown,2004-10-15 David Brown argues for the importance of experience of God as mediated through place in all its variety He explores the various ways in which such experiences once formed an essential element in making religion integral to human life and argues for their reinstatement at the centre of theological discussions about the existence of God In effect the discussion continues the theme of Brown s two much praised earlier volumes *Tradition and Imagination* and *Discipleship and Imagination* in its advocacy of the need for Christian theology to take much more seriously its relationship with the various wider cultures in which it has been set In its challenge to conventional philosophy of religion the book will be of interest to theologians and philosophers and also to historians of art and culture generally [Twelve Stories from Twelve Authors: Penguin Underground Lines](#),2013-03-07 To celebrate the 150th anniversary of the Tube the Penguin Underground Lines brings together 12 books by writers ranging from John O Farrell to John Lanchester Lucy Wadham to the Kids Company Name Penguin Underground Lines Date of Birth will be born 7th March 2013 Vital statistics Twelve books one for each Underground line to celebrate the Tube s 150th anniversary Idea for series Penguin asked twelve people to tell their tale of the city in 15 000 words or in one case no words at all each inspired by a different tube line Defining characteristics While the responses range from the polemical to the fantastical the personal to the societal they offer something for every taste Read individually they re delightful small reads pulled together they offer a particular portrait of a global city The 12 authors Fantastic Man Kids Company Danny Dorling John Lanchester William Leith Richard Mabey Paul Morley John O Farrell Philippe Parreno Leanne Shapton Lucy Wadham Peter York Authors include the masterly John Lanchester the children of Kids Company comic John O Farrell and social geographer Danny Dorling Ranging from the polemical to the fantastical the personal to the societal they offer something for every taste All experience the city as a cultural phenomenon and notice its nature and its people Read individually they re delightful small reads pulled together they offer a particular portrait of a global city Evening Standard

From a Cause to a Style Nathan Glazer, 2009-01-10 Modernism in architecture and urban design has failed the American city This is the decisive conclusion that renowned public intellectual Nathan Glazer has drawn from two decades of writing and thinking about what this architectural movement will bequeath to future generations In *From a Cause to a Style* he proclaims his disappointment with modernism and its impact on the American city Writing in the tradition of legendary American architectural critics Lewis Mumford and Jane Jacobs Glazer contends that modernism this new urban form that signaled not just a radical revolution in style but a social ambition to enhance the conditions under which ordinary people lived has fallen short on all counts The articles and essays collected here some never published before all updated reflect his ideas on subjects ranging from the livable city and public housing to building design public memorials and the uses of public space Glazer an undisputed giant among public intellectuals is perhaps best known for his writings on ethnicity and social policy where the unflinching honesty and independence of thought that he brought to bear on tough social questions has earned him respect from both the Left and the Right Here he challenges us to face some difficult truths about the public places that for better or worse define who we are as a society *From a Cause to a Style* is an exhilarating and thought provoking book that raises important questions about modernist architecture and the larger social aims it was supposed to have addressed and those it has abandoned

The Architecture of Survival Erik Trump, Jake Parcell, 2023-09-05 *The Architecture of Survival Setting and Politics in Apocalypse Films* offers a compelling exploration of how popular films and TV series from the past two decades use architectural spaces to comment on socio political issues The

authors harness varied theoretical perspectives to demonstrate how through set design these works suggest that certain kinds of architecture support human development community and freedom while other kinds separate us from our fellow humans and make democratic politics impossible The clean lines of modernist design serve in films such as *Contagion* and *Ex Machina* as a metaphor for the sanitized sterile politics that drive disaster In *The Walking Dead* apocalypse survivors favor traditional architectural styles when rebuilding society a choice that symbolically affirms their democratic principles The massive walls and super gentrification as seen in *Elysium* and *Army of the Dead* divide humanity with those on one side wielding illegitimate power Empty streetscapes intensify loneliness alienation and the destruction of civil norms Smart cities offering a blend of high tech surveillance and big data erode social capital and community in *Her* and *Transcendence* The book concludes with a somewhat hopeful glimpse into architecture's potential to mitigate the catastrophic adverse effects of climate change as seen in films like *Zootopia*

Modernist America Richard Pells, 2011-03-29 America's global cultural impact is largely seen as one sided with critics claiming that it has undermined other countries languages and traditions But contrary to popular belief the cultural relationship between the United States and the world has been reciprocal says Richard Pells The United States not only plays a large role in shaping international entertainment and tastes it is also a consumer of foreign intellectual and artistic influences Pells reveals how the American artists novelists composers jazz musicians and filmmakers who were part of the Modernist movement were greatly influenced by outside ideas and techniques People across the globe found familiarities in American entertainment resulting in a universal culture that has dominated the twentieth and twenty first centuries and fulfilled the aim of the Modernist movement to make the modern world seem more intelligible *Modernist America* brilliantly explains why George Gershwin's music Cole Porter's lyrics Jackson Pollock's paintings Bob Fosse's choreography Marlon Brando's acting and Orson Welles's storytelling were so influential and why these and other artists and entertainers simultaneously represent both an American and a modern global culture
