European Decolonization 1918-1981: An Introductory Survey Robert F. Holland, 1985-03-04 One of the most dramatically significant themes of the twentieth century has been the decline and final dismemberment of the European colonial empires This book outlines the general features which influence this decline and by concentrating on a series of case studies emphasises the varieties of experience within this broad historical process While primarily concerned with events in the British Empire the largest of the imperial systems Dr Holland also considers developments in the French Belgian Dutch and Portuguese dependencies The chronologically arranged sections focus on the sources of weakness in the European empires between 1918 and 1939 the impact of the Second World War the upheavals of the post war crisis the move to decolonization in the later 1950 s and early 1960 s and the subsequent realignment of relations between advanced and non advanced nations The aim of this study is to provide an introductory text for sixth form and university students on a vital dimension of change within international relationships in twentieth century

The Commonwealth Experience Nicholas Mansergh, 1982-12-01 From British to multiracial Commonwealth Nicholas Mansergh, 1982 **Norms in International Relations** Audie Klotz, 2018-09-05 Applying a social constructivist approach to her richly detailed case history Audie Jeanne Klotz demonstrates that normative standards such as racial equality can serve as much more than a weak constraint on fundamental strategic concerns Norms can play a crucial role in the formation of global policy After forty years of protest against apartheid the world celebrated Nelson Mandela s inauguration as South Africa s first democratically elected president Klotz considers why racial discrimination in South Africa became a global concern and why in a remarkable change of practice nations and international organizations adopted sanctions against the Pretoria regime By explaining how the world community actively came to condemn apartheid Norms in International Relations contributes to broader debates on the role of norms in global politics Klotz rehearses a fascinating history combining the power politics of economic sanctions and the normative politics of racial equality She reenacts the events that resulted in the United Nations decision to oppose apartheid The author also analyzes anti apartheid activism in the British Commonwealth and in the Organization of African Unity and she documents changing attitudes toward South African racial separateness in the United States Britain and Zimbabwe *Englishness and Empire 1939-1965* Wendy Webster, 2007-10-11 Did loss of imperial power and the end of empire have any significant impact on British culture and identity after 1945 Within a burgeoning literature on national identity and what it means to be British this is a question that has received surprisingly little attention Englishness and Empire makes an important and original contribution to recent debates about the domestic consequences of the end of empire Wendy Webster explores popular narratives of nation in the mainstream media archive

newspapers newsreels radio film and television The contours of the study generally follow stories told through prolific filmic and television imagery the Second World War the Coronation and Everest colonial wars of the 1950s and Winston Churchill's funeral The book analyses three main narratives that conflicted and collided in the period a Commonwealth that promised to maintain Britishness as a global identity siege narratives of colonial wars and immigration that showed a little England threatened by empire and its legacies and a story of national greatness celebrating the martial masculinity of British officers and leaders through which imperial identity leaked into narratives of the Second World War developed after 1945 The book also explores the significance of America to post imperial Britain Englishness and Empire considers how far and in what contexts and unexpected places imperial identity and loss of imperial power resonated in popular narratives of nation As the first monograph to investigate the significance of empire and its legacies in shaping national identity after 1945 this is an important study for all scholars interested in questions of national identity and their intersections with gender race empire immigration and decolonization

The Grand Delusion Stephen Haseler, 2012-05-30 In 2012 Britain and the Commonwealth celebrate the 60th anniversary of Elizabeth II's accession to the throne The royal family have overcome a number of obstacles in its recent history yet today it appears to be riding on a wave of popular affection But has Elizabeth II's reign been a good thing for the UK Or have the style rituals and underlying culture of the modern monarchy held Britain back from its potential in the 21st century world In this groundbreaking and thought provoking new book Stephen Haseler argues that the class structure which the monarchy has continued to encourage has retained outdated yet seemingly entrenched attitudes which have negatively affected Britain's economy capacity to innovate and international stature He provides an alternative political and social history of modern Britain which will be a provocative yet entertaining and informative read in the Queen's anniversary year

Placing Internationalism Stephen Legg, Mike Heffernan, Jake Hodder, Benjamin Thorpe, 2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences this edited collection studies the spaces and networks through which states civil society institutions and anti colonial political networks used these events to realise their visions of the international Taking an interdisciplinary approach contributors explore the spatial paradox of two fundamental features of modern internationalism First internationalism demanded the overcoming of space transcending the nation state in search of the shared interests of

humankind Second internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas From Paris 1919 to Bandung 1955 and beyond this book explores international conferences as the sites in which different forms of internationalism assumed material and social form While international permanent institutions such as the League of Nations UN and Institute of Pacific Relations constantly negotiated national and imperial politics lesser resourced political networks also used international conferences to forward their more radical demands Taken together these conferences radically expand our conception of where and how modern internationalism emerged and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question
