From Databases to Hypermedia Hermann Maurer, Nick Scherbakov, Zahran Halim, Zaidah Razak, 1998-09-29 This handbook is more than a standard introduction to databases it is a comprehensive set of tools that makes learning basic database and hypermedia concepts much easier The basic ideas and architecture of relational and object oriented databases are presented followed by hypermedia systems hypermedia and the Internet second generation hypermedia and hypermedia data models The material is presented in both printed form with many illustrations and in the form of 26 interactive electronic lessons for Windows     **Hypermedia/Hypertext and Object-oriented Databases** Heather Brown, 1991

**Hypermedia Systems and Applications** Jennifer A. Lennon, 2012-12-06 It is a pleasure and an honor to write a foreword for Jennifer Lennon's book *Hypermedia Systems and Applications World Wide Web and Beyond* I am fortunate to have been able to follow the development of this book from an excellent Ph D thesis to what I would consider one of the best and most comprehensive books in the area It has a good chance to become a must for teachers researchers and practitioners For the sake of this foreword let us combine the phenomena hypermedia the Internet and the WWW by just calling them the Web Well this Web surely has become one of the super hot topics from both a scholarly and a commercial point of view We have a saying that the Web is like a dog one year's development of the Web corresponds to seven human years You will be familiar with Murphy's law Anything that can go wrong will go wrong and with a plethora of derivatives or specializations thereof like If you are in an otherwise empty locker room the only other person there is bound to have a locker just on top of yours or If traffic is moving slowly you are always going to be in the slowest moving lane and so on Well I have coined a version that applies to the Web Whenever you have understood an important new development concerning the Web you can be sure that it is obsolete     **Visualising the Structure and Use of Large Scale Hypermedia Databases** Christopher Colburn Brown, 1998
