From the BBC Proms to Bernstein's Young People's Concerts initiatives to promote classical music have been a pervasive feature of twentieth century musical life The goal of these initiatives was rarely just to reach a larger and more diverse audience but to teach a particular way of listening that would help the public appreciate music This book examines for the first time how and why music appreciation has had such a defining and long lasting impact well beyond its roots in late Victorian liberalism It traces the networks of music educators philanthropists policy makers critics composers and musicians who rather than resisting new mass media sought to harness their pedagogic potential The book explores how listening became embroiled in a nexus of modern problems around citizenship leisure and education In so doing it ultimately reveals how a new cultural milieu the middlebrow emerged at the heart of Britain's experience of modernity **Must Read:**

Microbreweries, Nanobreweries, and Brewpubs Joseph Peter Klapatch, 2023-05-09 In the mid 1980s the American beer market offered far fewer options than what is available today When microbreweries began to come onto the scene distributors and retailers were skeptical of their new beers and did not believe that these new American brews would be able to compete with imports Newer smaller brewers also had to overcome antiquated laws and strong consumer brand loyalty to major domestic beers After years of struggles microbrewers established a foothold in the American beer market popularized new and previously underappreciated styles and set the stage for a massive proliferation of nanobreweries across the country This book takes a look at these microbreweries prime examples of American enterprise and innovation from an industry outsider's perspective The author explores a select number of small breweries from around the United States covering their signature brews histories and what it took for them to claim their niches in the marketplace

From Literature to Biterature Peter Swirski, 2013-10-01 From Literature to Biterature is based on the premise that in the foreseeable future computers will become capable of creating works of literature Among hundreds of other questions it considers Under which conditions would machines become capable of creative writing Given that computer evolution will exceed the pace of natural evolution a million fold what will such a state of affairs entail in terms of art culture social life and even nonhuman rights Drawing a map of impending literary cultural social and technological revolutions Peter Swirski boldly assumes that computers will leap from mere syntax driven processing to semantically rich understanding He argues that acknowledging biterature as a species of literature will involve adopting the same range of attitudes to computer authors computhurs as to human ones and that it will be necessary to approach them as agents with internal states and creative intentions Ranging from the metafiction of Stanislaw Lem to the Turing test familiar to scientists working in Artificial Intelligence and the philosophers of mind to the evolutionary trends of culture and machines Swirski's scenarios lay the groundwork for a new area of study on the cusp of literary futurology evolutionary cognition and philosophy of the future
