The Metropolis in Black and White George C. Galster,2017-07-12 The Metropolis in Black and White highlights a stark fact America's metropolitan areas are more polarized along racial lines than at any time since the mid 1960s Though urban areas have become multicultural the editors argue that black white racial differences will outlast ethnic differences in metropolitan America and that the race issue in most urban areas is perceived as a black white one Galster and Hill perceive that the theme of place power and polarization is most powerful when blacks and whites are contrasted African Americans on average are the poorest most segregated most disadvantaged urban racial or ethnic group because they are deeply entangled in the web of interrelationships connecting place power and polarization Since these interrelationships form a comprehensive set of social structures that oppress African Americans they can be judged to be racist at their core Race not merely class continues to play a pivotal role in shaping urban African Americans In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies

Understanding the City through its Margins André Chappatte,Ulrike Freitag,Nora Lafi,2017-07-28 Cities the world over and in particular developing countries suffer from uneven development and inequality This is often coupled with the view that these inequalities constitute unfortunate anomalies In contrast this edited volume draws out the ways in which the city has not been able to exist without its margins both materially ideationally and socially In this book the margins are first the mirrors of the city and second a fundamental route through which various centers can legitimate and sustain their power Contemporary case studies are compared to a number of those from history with the accent on Asia Africa and the Middle East and engage with

the underlying theoretical questions of what is the urban margin and what is marginality in urban society and spaces

Culture, Politics, Race and Diaspora Brian Meeks, 2007 Stuart Hall in whose honour this volume is compiled has made significant contributions to contemporary social and political discourse Constantly praised for his scholarly prescience he was at the helm of the forging and definition of the discipline of Cultural Studies and nurtured an entire cadre of young intellectuals who continue to make remarkable contributions in the fields of Cultural Studies and Social Criticism The essays that constitute this collection all in different ways contend with Hall's methodology his philosophy as well as many other dimensions of his rich and textured intellectual career More importantly however they serve to reconnect his work to the social context of his island of birth Jamaica and the wider Caribbean West Indian in the West Percy Hintzen, 2001-11 As new immigrant communities continue to flourish in U S cities their members continually face challenges of assimilation in the organization of their ethnic identities West Indians provide a vibrant example In *West Indian in the West* Percy Hintzen draws on extensive ethnographic work with the West Indian community in the San Francisco Bay area to illuminate the ways in which social context affects ethnic identity formation The memories symbols and images with which West Indians identify in order to differentiate themselves from the culture which surrounds them are distinct

depending on what part of the U S they live in West Indian identity comes to take on different meanings within different locations in the United States In the San Francisco Bay area West Indians negotiate their identity within a system of race relations that is shaped by the social and political power of African Americans By asserting their racial identity as black West Indians make legal and official claims to resources reserved exclusively for African Americans At the same time the West Indian community insulates itself from the problems of the black white dichotomy in the U S by setting itself apart Hintzen examines how West Indians publicly assert their identity by making use of the stereotypic understandings of West Indians which exist in the larger culture He shows how ethnic communities negotiate spaces for themselves within the broader contexts in which they live We Are Not What We Seem Roderick D. Bush,2000 *Time for Life* John Robinson,Geoffrey Godbey,2010-11 Is it possible that Americans have more free time than they did thirty years ago While few may believe it research based on careful records of how we actually spend our time shows that we average more than an hour more free time per day than in the 1960s Time use experts John P Robinson and Geoffrey Godbey received national attention when their controversial findings were first published in 1997 Now the book is updated with a new chapter that includes results of the 1995 1997 data from the Americans Use of Time Project Time for Life an outstanding work of scholarship that manages to be highly readable demands the attention of everyone interested in what s happening in today s society Edward Cornish The Futurist Time for Life is excellent fodder for lively classroom discussions not only about family time use but about the ontological and epistemological assumptions in the prevailing post positivist paradigm of family science Alan J Hawkins and Jeffrey Hill Journal of Marriage and the Family Regardless of where you stand on this issue Robinson and Godbey s arguments and data make for very interesting reading and open a cultural window on American society This is a piece of scholarship that should be read and its conclusions contemplated by people well outside the readership of this journal Time for Life is good social science research that should appeal to a broad audience Journal of Communication **Gay Religion** Scott Thumma,Edward R. Gray,2004-12-10 Conflicts over homosexuality and gay rights threaten to break apart denominations if not North American society These heated theological and political debates have as well obscured the fact that many gays and lesbians are religiously active individuals Gay Religion is the first book to give a straightforward presentation of the spiritual lives practices and expressions of gays lesbians bisexuals and transgender Drawing from a wide range of religious traditions new and established scholars explore the range of gay religious expression in denominations sects and even outside recognized religious institutions The essays ask what these religious innovations mean to the continually evolving religious environment of North America With its helpful section introductions and an appendix providing profiles of organizations involved Gay Religion is a unique and compelling resource for anyone interested in homosexuality and American religion **Reproducing Domination** Percy C. Steed, Laurence W.

Moreland, 2021-12-14 Scholars, journalists, writers and pundits have long regarded the South as the nation's most politically distinctive region Its culture, history and social and economic institutions have fostered unique political ideas that intrigue observers and have had profound political consequences for the nation's citizens, politicians and policymakers *Writing Southern Politics* is the most comprehensive review of the large body of post World War II literature on southern politics Since the publication of V. O. Key Jr.'s landmark work *Southern Politics in State and Nation* 1949 scholars have produced an astounding number of books, monographs, professional journal articles and research papers addressing elements of continuity and change in southern politics The contributors to this book sort through the literature identifying major themes, examining areas of scholarly disagreement and making the key dimensions and contours of the region's politics understandable Individually the essays in this volume identify and clarify the key writing and research in selected subfields of southern politics including religion, race, women and political parties Collectively the essays identify and discuss the major components of and trends in southern politics over the past half century The contributors, some of the foremost scholars in the field, have been heavily involved in researching and writing about southern politics during the past three decades and have observed the development of many of the research projects that form the foundation of southern political literature In many instances their own writings are included in the body of literature they discuss bringing unique skills, research and perspectives to their original essays In addition to reviewing existing literature *Writing Southern Politics* also includes suggestions for a future research agenda Not all aspects of the region's dramatic fifty year transformation have been fully explored and the continuation of this development ensures new avenues to examine The discussion of past research and writing is an invaluable tool for understanding the trends in southern politics over the past half century By examining these trends and

developing an agenda for future research the authors provide a roadmap for identifying the changes that will likely shape the region over the next half century

Representations of Blackness and the Performance of Identities Jean Rahier, 1999-05-30 The essays gathered in this volume deal with representations of blackness and the performance of black identities in various historically determined societal contexts of the Americas Benin and Spain The book is grounded on the premise that representations constitute in part the world in which we live An important aspect of the struggles of dominated people consists in more or less overtly challenging manipulating combatting negating and sometimes inverting representations of themselves reproduced in the dominant discourse of their national society The contributors approach various forms of blackness within the fluctuation of political economic and social processes embedded in particular time space contexts which are constituted within local regional national and transnational dimensions Identities whatever they may be cannot be defined once and for all in fixed or essentialist terms as if they were unchanging or frozen in time and

space. If, as this book proposes, identities are fluid, it is because they are constantly enacted and reenacted, performed anew within specific situations and within changing socioeconomic and political contexts that provide sites for their negotiations and renegotiations, definitions and redefinitions. Thus, the book approaches black identities as performances. **Radical Educators: Rearticulating Education and Social Change** Jennifer Gale de Saxe, Tina Y. Gourd, 2018-10-03. This book is a collection of six case studies of teacher agency in action, centering on voices of educators who engaged in activist work throughout the history of education in the US. Through a lens of teacher agency and resistance, chapter authors explore the stories of individual educators to determine how particular historical and cultural contexts contributed to these educators' activist efforts. By analyzing specific modes and methods of resistance found within diverse communities throughout the last century of US education, this book helps to identify and place into theoretical and historical context an underemphasized narrative of professional teacher activists within American education.
