ABSTRACT

Since the collapse of Communism in Central and Eastern Europe and the Former Soviet Union, the reform process has been considerably influenced by the neoclassical economic approach to transition. This has heavily emphasized competitive markets and economic liberalization measures *per se*, often ignoring the establishment of adequate institutional frameworks and resulting in high transition costs and the sidelining of environmental concerns. Alternative models of market transformations in post-Communist societies have been forwarded in the literature, though these have been arguably less influential. We explore the role of these economic ideologies in shaping transition paths, with a focus on the Post-Keynesian economic approach as an alternative to the neoclassical paradigm. We further propose a holistic approach to transition to account for appropriate institutional developments in the area of environmental sustainability. We argue that transition economies need to reconsider their 'market transformation' process in order to capitalize on their potential and mark their own contribution to positive shifts in sustainable development paradigms. book explores the hypothesis of the emergence of a dependent capitalism in Central and Eastern Europe In a first theoretical part this book presents the main approaches that structure the field of comparative capitalism and then examines this model shaped by the inflow of foreign capital In an original way it proposes to integrate the form of the monetary regime into the dependent capitalism analysis and to extend it to Balkan countries The monetary regime is seen as complementary to the other elements of the institutional configuration of dependent capitalism In the second part the authors adopt a historical and empirical perspective First they demonstrate how dependent capitalism has emerged in Central and Eastern Europe and the Baltic States over the last 30 years as part of the process of socio economic transformation that began in 1990 The crisis of 2008 was an indicator of this dependence on Western capital Secondly they extend the analysis to the Balkan countries and show that dependence is even stronger for them particularly in the monetary area as evidenced by the implementation of currency boards or euroization phenomena This book is of interest to academics and students as well as to business and
