Empirical Models and Policy Making Mary Morgan, Frank den Butter, 2003-09-02 This collection written by highly placed practitioners and academic economists provides a picture of how economic modellers and policy makers interact The book provides international case studies of particular interactions between models and policy making and argues that the flow of information is two way

Macroeconomic Medium-Term Models in the Nordic Countries O. Bjerkholt, J. Røstved, 2017-07-19 This is the first major joint presentation of macroeconomic models of Denmark Finland Norway and Sweden Its origin is a selection of the presentations at a seminar on macroeconomic modelling in the Nordic countries held in Lyngby Denmark 8-9 October 1984 sponsored by the Nordic Ministries of Finance The book is concentrated around a thorough presentation of the main macroeconomic medium term models used in government planning and policy making in each of the four countries These models are in Denmark ADAM developed by the Central Statistical Office in Finland KESSU developed within the Ministry of Finance in Norway MODAG developed by the Central Bureau of Statistics and in Sweden EMMA developed within the Ministry of Finance An introduction to Nordic macroeconomic models is provided as well as significant features of the institutional use of models within governments in these countries On the basis of the data presented in the book the effects of devaluation wage increases and fiscal policy in the Nordic economies can be compared with each other as well as with other small open economies

Macroeconometric Models Władysław Welfe, 2013-02-15 This book gives a comprehensive description of macroeconometric modeling and its development over time The first part

depicts the history of macroeconomic model building starting with Jan Tinbergen's and Lawrence R Klein's contributions. It is unique in summarizing the development and specific structure of macroeconomic models built in North America, Europe and various other parts of the world. The work thus offers an extensive source for researchers in the field. The second part of the book covers the systematic characteristics of macroeconomic models. It includes the household and enterprise sectors, disequilibria, financial flows and money market sectors.

Macroeconomic Medium-term Models in the Nordic Countries Olav Bjerkholt, Jørgen Røsted, 1987 Contributions to Economic Analysis Johan A. Lybeck, Magnus Henrekson, 1952 **Optimization Models in a Transition Economy** Ivan V. Sergienko, Mikhail Mikhalevich, Ludmilla Koshlai, 2014-12-11

This book opens new avenues in understanding mathematical models within the context of a transition economy. The exposition lays out the methods for combining different mathematical structures and tools to effectively build the next model that will accurately reflect real world economic processes. Mathematical modeling of weather phenomena allows us to forecast certain essential weather parameters without any possibility of changing them. By contrast, modeling of transition economies gives us the freedom to not only predict changes in important indexes of all types of economies but also to influence them more effectively in the desired direction. Simply put, any economy including a transitional one can be controlled. This book is useful to anyone who wants to increase profits within their business or improve the quality of their family life and the economic area they live in. It is beneficial for undergraduate and graduate students specializing in the fields of Economic Informatics, Economic Cybernetics, Applied Mathematics and Large Information Systems as well as for professional economists and employees of state planning and statistical organizations.

Working Life in the Nordic Region Poul Nielson, *New Contributions to Transportation Analysis in Europe* Michel Beuthe, Peter Nijkamp, 2018-10-11 First published in 1999 this volume responded to the drastic fluctuations in policy changes within the European Union and explored the potential for the various transportation framework programmes financed by the European Commission The contributors offer an array of recent advances in transportation with a particular focus on Europe Areas explored include sustainability multimodal transport policy freight transport services transport telematics regionalism transalpine freight transport just in time production and the integration of strategic infrastructure networks in Europe

Econometric Business Cycle Research Jan Jacobs, 2012-12-06 Econometric Business Cycle Research deals with econometric business cycle research EBCR a term introduced by the Nobel laureate Jan Tinbergen for his econometric method of testing economic business cycle theories EBCR combines economic theory and measurement in the study of business cycles i.e. ups and downs in overall economic activity We assess four methods of EBCR business cycle indicators simultaneous equations models vector autoregressive systems and real business indicators After a sketch of the history of the methods we investigate whether the methods meet the goals of EBCR the three traditional ones description forecasting and policy evaluation and the one Tinbergen introduced the implementation testing of business cycles The first three EBCR methods are illustrated for the Netherlands a typical example of a small open economy The main conclusion of the book is that simultaneous equation models are the best vehicle for EBCR if all its goals are to be attained simultaneously This conclusion is based on a fairly detailed assessment of the methods and is not overturned in the empirical illustrations The main conclusion does not imply the end of other EBCR methods Not all goals have to be met with a single vehicle other methods might serve the purpose equally well or even better For example if one is interested in business cycle forecasts one might prefer a business cycle indicator or vector autoregressive system A second conclusion is that many ideas concepts that play an important role in current discussions about econometric methodology in general and EBCR in particular were put forward in the 1930s and 1940s A third conclusion is that it is difficult if not impossible to compare the outcomes of RBC models to outcomes of the other three methods because RBC modellers are not interested in modelling business cycles on an observation per observation basis A more general conclusion in this respect is that methods should adopt the same concept of business cycles to make them comparable

The Cointegrated VAR Model Katarina Juselius, 2006-12-07 This valuable text provides a comprehensive introduction to VAR modelling and how it can be applied In particular the author focuses on the properties of the Cointegrated VAR model and its implications for macroeconomic inference when data are non stationary The text provides a number of insights into the links between statistical econometric modelling and economic theory and

gives a thorough treatment of identification of the long run and short run structure as well as of the common stochastic trends and the impulse response functions providing in each case illustrations of applicability This book presents the main ingredients of the Copenhagen School of Time Series Econometrics in a transparent and coherent framework The distinguishing feature of this school is that econometric theory and applications have been developed in close cooperation The guiding principle is that good econometric work should take econometrics institutions and economics seriously The author uses a single data set throughout most of the book to guide the reader through the econometric theory while also revealing the full implications for the underlying economic model To test ensure full understanding the book concludes with the introduction of two new data sets to combine readers understanding of econometric theory and economic models with economic reality

World Scientific Reference On Asia-Pacific Trade Policies (In 2 Volumes) Kym

Anderson, 2019-12-19 Protectionism has been placed under the media spotlight with news headlines generated by populist anti globalization movements and Donald Trump's term as US President Such a policy stance is putting at risk unilateral trade reform efforts in the Asia Pacific region and elsewhere This two volume reference work provides a timely update on how far the region has come in opening markets It analyzes the motivations or ostensible objectives of policies adopted in the past the changing extent of the domestic price distortions involved the economic effects of those policies at home and abroad the political economy forces at work that brought about those policies and their subsequent reform their consequences for international trade economic welfare and poverty alleviation and prospects for sustainable improvements in current policies Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers changed over the past century but especially since the 1980s and how that has affected trade between natural resource poor and resource rich economies This set is highly recommended for those who are interested in the economics and politics of trade policies agricultural economics economic development and food and nutrition security in the Asia Pacific region and beyond

Handbook of Computable General Equilibrium Modeling Peter B. Dixon, Dale Jorgenson, 2013-01-08

Top scholars synthesize and analyze scholarship on this widely used tool of policy analysis in 27 articles setting forth its accomplishments difficulties and means of implementation Though CGE modeling does not play a prominent role in top US graduate schools it is employed universally in the development of economic policy This collection is particularly important because it presents a history of modeling applications and examines competing points of view Presents coherent summaries of CGE theories that inform major model types Covers the construction of CGE databases model solving and computer assisted interpretation of results Shows how CGE modeling has made a contribution to economic policy

Money Demand in Europe Helmut Lütkepohl, Jürgen Wolters, 2013-04-17

In 1999 a number of member states of the European Union will adopt a common currency This change in the monetary system requires that a European Central Bank is set up and a common monetary policy is pursued There is general agreement among those countries which are likely to join the common

currency that price level stability has to be the ultimate objective of monetary policy. It is an open issue, however, what kind of policy is best suited for that purpose. The alternative strategies under discussion are a direct inflation targeting, an intermediate monetary targeting or a mixture of both. For these policy strategies, a stable money demand relation is of central importance. Therefore, a workshop on Money Demand in Europe was organized at the Humboldt University in Berlin on October 10-11, 1997. This research conference brought together academic and central bank economists and econometricians, predominantly from Europe, to discuss issues on specification, estimation, and in particular, stability of money demand relations, both in a single equation and in a systems framework. In this volume, revised versions of the papers presented and discussed at the workshop are collected. The volume thereby gives an overview of money demand analysis in Europe on the eve of the introduction of the Euro in some European countries. It contributes to the discussion on a suitable monetary policy for the new European Central Bank.
