Walstad,2012-12-06 Economics is taught in some form in the secondary schools of nations throughout the world The subject is rarely taught in elementary schools and while economics courses are offered in universities the majority of students end their formal education with secondary school Thus the best opportunity for the economic education of the youth of a nation occurs in secondary schools This book examines economic education at this critical level of the educational system The teaching of economics in secondary schools varies across countries These differences occur because of history the structure of education and other national factors At the same time there are common elements in the economic education of many countries especially in content coverage This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book The international perspective is developed in the six sections of the volume The first section discusses why nations should include economics in school curricula and presents a framework for teaching economics that should have global appeal Dissension and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies

**Canadian Perspectives on Immigration in Small Cities** Glenda Tibe Bonifacio, Julie L. Drolet, 2016-10-31 This book examines immigration to small cities throughout Canada. It explores the distinct challenges brought about by the influx of people to urban communities which typically have less than 100 000 residents. The essays are organized into four main sections: partnerships, resources and capacities, identities, belonging and social networks, health, politics and diversity, and Francophone minority communities. Taken together, they provide a comprehensive multi-disciplinary perspective on the contemporary realities of immigration to small urban locations. Readers will discover how different groups of migrants, immigrants and Francophone minorities confront systemic discrimination, how settlement agencies and organizations develop unique strategies for negotiating limited resources and embracing opportunities brought about by changing demographics, and how small cities work hard to develop inclusive communities and respond to social exclusions. In addition, each essay includes a case study that highlights the topic under discussion in a particular city or region, from Brandon, Manitoba to the Thompson-Nicola Region in British Columbia, from Peterborough, Ontario to the Niagara Region. As a complement to metropolitan-based works on immigration in Canada, this collection offers an important dimension in migration studies that will be of interest to academics, researchers as well as policymakers and practitioners working on immigrant integration and settlement.

*Europe, Canada and the Comprehensive Economic and Trade Agreement* Kurt Hübner, 2011-04-01 The Great Recession and the turn towards all forms of protectionism stress the relevance of international trade policy. With the global economy undergoing deep structural changes, the negotiations between Canada and the EU on a Comprehensive Economic and Trade Agreement (CETA) present a real-time experiment that sheds light on the direction that the relationships between two economic units of the G8 will take. For Canada, an agreement with the EU would end its current dependency on the US; for the EU, an agreement with Canada would be a first with a G8 economy and indicate how its new trade strategy, Global Europe, will look like. This book is the first to simultaneously analyze the undercurrents of this project and introduce the main topics at hand. CETA is much more than a simple free trade agreement; its breadth covers regulatory aspects in goods, services and finance, the opening of public procurement markets, attitudes and policies of Canadian provinces towards liberalization, climate policies and international leadership claims of the EU in comparison to Canadian policy attempts, the challenges of the Euro project and the reform efforts, and the challenges of the Euro as an international reserve currency. CETA is a challenging project that will kick-start enormous changes in trade policy making as well as in market openness in Canada. It will mark the EU's efforts to re-make the Atlantic Economy. This book provides deep insights into the ambiguity of the project and addresses the

implications of a rapidly changing global economy for trade policy Offering analysis of the financial industry banking trade policy climate change strategy and the Euro exchange rate this book should be of interest to students and policy makers alike
