Richard Thaler's contributions to Nudge Theory. Core concepts such as prospect theory, various cognitive biases (e.g., anchoring, loss aversion, present bias, sunk cost fallacy, mental accounting, and heuristics (e.g., satisficing, availability heuristic) are thoroughly explained. The text also examines traditional models of consumer behavior and analyzes internal psychological, external sociocultural, and situational influences on consumer choices. Furthermore, the book explores the practical applications of behavioral economics in marketing strategy, including behavioral pricing, promotional offers, leveraging scarcity, and social proof, personalization, gamification, and emotion-based marketing. It extends its scope to public policy and product design, demonstrating how nudges can guide decisions for societal benefit and how behavioral insights optimize user experiences. The book concludes by addressing future directions, including the role of AI and big data, and critically examines the ethical implications of behavioral interventions.

Economics and Consumer Behavior Angus Deaton, John Muellbauer, 1980-05-30. For advanced courses in economic analysis, this book presents the economic theory of consumer behavior, focusing on the applications of the theory to welfare, economies, and econometric analysis.

The Political Economy of Consumer Behavior Bruce Pietrykowski, 2009-05-07. Consumption forms a major part of people's lives. As such, geographers, historians of technology, and sociologists have devoted much attention to trying to figure out what makes consumption meaningful. By contrast, economists have been content to hold onto theories of consumption that depend on a self-interested representative agent making utility-maximizing decisions. Pietrykowski develops this alternative account through the recovery of past attempts to forge a different analytical approach to the study of consumption. In particular, theories of consumption espoused by home economists, psychological economists, and Regulation school theorists are critically reviewed. These research projects, marginalized by the mainstream, are the precursors of contemporary scholarship in feminist, behavioural, and radical political economics. Reclaiming this work greatly enlarges the scope for contemporary research in consumer behavior. Pietrykowski then provides a richly textured set of case studies of green automobility, slow food, and alternative local currency in order to explore the diversity of user cultures and to highlight resistant forms of consumer practice. By carefully interweaving historical and interdisciplinary research, Pietrykowski creates a lively and incisive critique of mainstream economics. This monograph will be of interest to academic economists, sociologists, historians, and graduate students. In addition, the economics of consumption would also be of interest to readers in management, marketing, and schools of business administration.
