Political and Economic Analysis of State-Owned Enterprise Reform Huiming Zhang, 2021-07-29 In revisiting the forty year history of reforms to China's state owned enterprises SOE the book assesses the experiences of this process of reform and scrutinizes how this has helped advance the country's economy overall The author finds that China's SOE reform not only commits to institutional innovation within the corporation in terms of operating mechanisms management structure legal organization and the economic system of the enterprise but that it is also underpinned by a series of policies that highlight an increasing market orientation The measures have given rise to a benign interaction between enterprise reform and market development while switching the SOE's role from appendages of government organs under a planned economic system to more autonomous entities that integrate public ownership and the market economy In this regard SOE reform's success in constructing a modern enterprise system serves as the micro foundation and core of an improved socialist market economic system The book will appeal to academics and students interested in political economy and the Chinese economy with particular reference to SOE reform and the recent economic transition in China

**Privatization and Public Enterprises** Mr. Richard Hemming, Mr. Ali M. Mansoor, 1998-09-15 This paper examines the role that privatization can play within a wider strategy designed to overcome the problems associated with public enterprises For this purpose privatization is defined as a transfer of ownership and control from the public to the private sector with particular reference to asset sales It is therefore equated with total or partial denationalization Economic efficiency is not only the key to improving the performance of the public enterprise sector but is also the source of other gains often attributed to privatization in particular

its favorable budgetary impact To public enterprises that are subject to national or international competition privatization offers the possibility of increased productive efficiency as government financial backing is withdrawn and bankruptcy and takeover become possibilities The admissibility and desirability of privatization as well as what types of enterprise should be privatized ought to be determined by similar considerations in both industrial and developing countries

*India's Economic Policy* Bimal Jalan,2000-10-14 A lucid and brilliantly argued book on India s recent economic reforms Nearly fifty years after independence India remains a very poor country It ranks near the bottom in terms of per capita income and is similarly placed in the Human Development Index which measures social well being Economic growth in India has been less than half that of China or even other countries in Asia And governments at the Centre as well as in the states are close to insolvency The reason for our spectacular underachievement lies in the continuation of policies which had a certain validity as a response to the colonial experience but which have long outlived their usefulness The global economic scene has changed dramatically since they were formulated and we must respond to the new realities Bimal Jalan the well known economist and present Governor of the RBI in this lucid and well argued book makes a case for governments doing what they alone can best do and less of what they cannot do effectively

Globalization, Privatization and Free Market Economy C. Rao,1998-06-25 The three dominant forces shaping societies and economies around the world are globalization privatization and liberalization Because these processes are interrelated they must be addressed collectively The contributors to the volume show that globalization privatization and liberalization are multidimensional phenomena that impact not only the economic considerations of governments but also sociocultural and environmental aspects of societies The three phenomena also affect these units of analysis which Rao and his colleagues identify as regional country industrial and organizational The result is a cogent discussion of these powerful global forces for the academic community professionals in economic development banking finance international investment
