gave the topic a new impetus its scope narrowed to a set of economically based strategies After 1960 however faith in such strategies began to wane in the face of indifferent results and a general faltering of confidence in economists boasts of scientific expertise In the twenty first century development research is being pursued using research methods that generate disconnected results As a result it seems unlikely that any grand narrative will be created in the future and that Neo liberalism will be the last of this particular kind of socioeconomic theory With a broad scope of content and clear exposition of academic thinking this book guides the reader through the way in which the policy adopted as a consequence of modern theories has been less effective because of the neglect or a misunderstanding of the social context within which they operate
