Globalization Chiara Oldani,Jan Wouters,2018-09-18 The G7 a self selected club of like minded industrialized countries looks at first glance ill suited to address current anti globalist concerns Despite this it has successfully confronted anti globalization populist and protectionist pressures by focussing on concerns surrounding the destruction of the natural environment immigration transnational crime drugs disease and terrorism thus demonstrating the social and ecological advantages that globalization brings Exploring how the world's oldest informal summit institution continues to respond to rising anti globalisation populism and protectionism this book investigates the contribution the G7 makes to global governance through its actions and accountability of its members The expert contributors analyse from different perspectives the issues that have contributed to the rise of populism and protectionism and how well the G7 has responded to them Each contribution identifies avenues that might allow renewing and strengthening the role of the G7 in times of global change with a view of strengthening its legitimacy and effectiveness It will be of interest to policy makers diplomats scholars of international relations international political economy diplomacy summitry and global governance The issues discussed will also be particularly relevant to those working for civil society and non governmental organizations seeking to participate in governance forums or to influence those who do *The Role of the G8 in International Peace and Security* Risto

Penttilä,2013-06-17 This Adelphi Paper is the first concise yet comprehensive analysis of the role of the G8 in international peace and security It argues that the G7 8 has a long and impressive history in the field of international security The G7 8 has for example spearheaded the introduction of low politics and soft security to the top table of great power diplomacy and

integrated Japan and later Russia into the realm of Western security discussions In questions of war and peace the G8 does not command the legitimacy of the UN Security Council but for the international community is a more acceptable vehicle than unilateral action As such the G8 can be seen as a not worthy second best option after the UN Security Council This Paper further argues that China should be admitted into the G8 first as an observer and later as a member There is also a strong argument for the European Union to have one seat at the G8 even if such a change does not seem realistic today The G8 bears great resemblance to the 19th century Concert of Europe Whether it will assume a similar role in the 21st century depends in the final analysis on whether the United States welcomes such a role for the G8

Presidential Selection

Alexander Heard, Michael Nelson, 1987 This study incorporates three important themes into the study of presidential selection What are the international implications of how the United States chooses its presidents How does the process affect other nations Does it enhance or diminish the ability of the United States to deal effectively with the rest of the world How do the changing characteristics of the presidential selection process affect the shaping of public policies and vice versa For example how have changes in citizen participation campaign technologies and campaign finance laws altered the balance of political power among institutions and interests What is the influence of the Constitution on presidential selection as in the prescribed qualifications for the office and in provisions for unusual circumstances
