Cultivating Nature Sarah R. Hamilton,2018-04-15 Winner of the 2019 Turku Book Award from the European Society for Environmental History The Albufera Natural Park an area ten kilometers south of Valencia that is widely regarded as the birthplace of paella has long been prized by residents and visitors alike Since the twentieth century the disparate visions of city dwellers farmers fishermen scientists politicians and tourists have made this working landscape a site of ongoing conflict over environmental conservation in Europe the future of Spain and Valencian identity In Cultivating Nature Sarah Hamilton explores the Albufera s contested lands and waters which have supported and been transformed by human activity for a millennium in order to understand regional national and global social histories She argues that efforts to preserve biological and cultural diversity must incorporate the interests of those who live within heavily modified and long exploited ecosystems such as the Albufera de Valencia Shifting between local struggles and global debates this fascinating environmental history reveals how Franco s dictatorship Spain s integration with Europe and the crisis in European agriculture have shaped the Albufera its users and its inhabitants

The Economics of Pollution Havens Don Fullerton,2006 Analyzes how country characteristics determine environmental rules how those rules affect production costs trade and investment flows how those flows affect pollution prices and incomes and finally how all of these last considerations feed back into environmental rules
