*An Economic Analysis of Bilateral Investment Treaties* Jan Peter Sasse, 2011-03-02 Bilateral Investment Treaties BITs are an important instrument for the protection of foreign direct investment FDI However compared to international trade law international investment law has so far received only little research attention from an economic point of view By applying a law and economics approach Jan Peter Sasse provides a systematic analysis of the way BITs function He explains why BITs are more than just a signal how they relate to institutional competition as well as to institutional quality and why transparency in international investment arbitration is hard to achieve and may even be detrimental

**Good Faith Obligation** Alex Wan, Peng Guo, 2024-09-10 This book provides a study on the relevance of good faith obligation with a specific focus on Australia and China Good faith has been hailed as one of the most important unresolved contractual issues in contract law There have been numerous judicial approaches over the years to articulate a baseline for good faith application however the direction taken in dealing with this important issue is generally unsatisfactory both in producing a coherent understanding of the role and sustaining a uniform application of good faith in contracts This book concentrates on examining whether the continued relevance of good faith in arm s length contractual relationships based on the reasonable expectations of the contracting parties can be maintained To accomplish this good faith is examined by revisiting the legal approaches from a comparative perspective in understanding whether there is a continuing role for good faith in commercial contracts

Constitutional Fragments Gunther Teubner, 2012-03-01 In recent years a series of scandals have challenged the traditional political reliance on public constitutional law and human rights as a safeguard of human well being Multinational corporations have violated human rights private intermediaries in the internet have threatened freedom of opinion and the global capital markets unleashed catastrophic risks All of these phenomena call for a response from traditional constitutionalism Yet it is outside the limits of the nation state in transnational politics and outside institutionalized politics in the private sectors of global society that these constitutional problems arise It is widely accepted that there is a crisis in traditional constitutionalism caused by transnationalization and privatization How the crisis can be overcome is one of the major controversies of modern political and constitutional theory This book sets out an answer to that problem It argues that the obstinate state and politics centrality of traditional constitutionalism needs to be counteracted by a sociological approach which so far has remained neglected in the constitutional debate Constitutional sociology projects the questions of constitutionalism not only onto the relationship between public politics and law but onto the whole society It argues that constitutionalism has the potential to counteract the expansionist tendencies of social systems outside the state world particularly of the globalized economy science and technology and the information media when they endanger individual or institutional autonomy The book identifies transnational regimes particularly in the private area as the new constitutional subjects in a global society rivals to the order and power of nation states It presents a model of transnational societal

constitutional fragments that could bring the values of constitutionalism to bear on these private networks examining the potential horizontal application of human rights in the private sphere and how such fragments could interact An original and provocative contribution to the literature on modern constitutionalism Constitutional Fragments is essential reading for all those engaged in transnational political theory

**The Role of Law in China's Economic Development, 1978-2011** Jia Hu, 2024-03-29 This book concerns how China's legal institutions promoted its economic growth and demonstrates that the law has played different roles at various stages of China's economic transformation a signal of legal paradigm shifts in reaction to the changing political and economic pursuits By decomposing the role of law in the process the author argues that while the Chinese economy was transforming from a planned economy to a market oriented one the law also made its adjustment as a response the Chinese legal system was evolving from the one consisting of primarily substantive laws to the one filled with high level formal laws by the end of the last century The above observation of legal formalization is further consolidated by introducing the particularities of China's legal education in those years a topic rarely dealt with yet of significance to comprehensively understand the Chinese legal system in practice Overall the present book argues against the modernization theory and determinism that would anticipate a similar developmental path globally and shows that the relationship between law and economic development is contingent Therefrom this study weighs in the law and development debate and breaks a perception of static law in the economy by rejecting the conventional perception of established legal institutions as a precondition of modernity Hence this book could appeal to legal scholars and sociologists interested in reevaluating western theories of free economy and its relationships to the law In addition scholars interested in research methodology would find the perspective of paradigm shifts in interpreting China's transformations a helpful analytical framework in research Moreover policymakers and legislators concerned about the characteristics of law for economic results would also find the book useful
