Economics Of Nonconvex Ecosystems:

The Economics of Non-Convex Ecosystems Partha Dasgupta, Karl-Göran Mäler, 2006-04-11 Economists often assume that ecosystem and population dynamics are subject to convex even linear processes But research by ecosystem and population ecologists suggests that such processes are very often non convex for example a possible flip of the Gulf Stream due to fresh water intrusion from melting glaciers This has dramatic implications for environmental and resource economics since mistakes in management could prove more costly than imagined *Mathematical Models in Economics - Volume II* Wei-Bin Zhang, 2010-06-10 Mathematical Models in Economics is a component of Encyclopedia of Mathematical Sciences in which is part of the global Encyclopedia of Life Support Systems EOLSS an integrated compendium of twenty one Encyclopedias This theme is organized into several different topics and introduces the applications of mathematics to economics Mathematical economics has experienced rapid growth generating many new academic fields associated with the development of mathematical theory and computer Mathematics is the backbone of modern economics It plays a basic role in creating ideas constructing new theories and empirically testing ideas and theories Mathematics is now an integral part of economics The main advances in modern economics are characterized by applying mathematics to various economic problems Many of today's profound insights into economic problems could hardly be obtained without the help of mathematics The concepts of equilibrium versus non equilibrium stability versus instability and steady states versus chaos in the contemporary literature are difficult to explain without mathematics The theme discusses on modern versions of some classical economic theories taking account of balancing between significance of economic issues and mathematical techniques These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **The Measurement of Environmental and Resource Values** A. Myrick Freeman III, Joseph A. Herriges, Catherine L. Kling, 2014-06-05 The first edition of this important work was the winner of the 2002 Publication of Enduring Quality award by the Association of Environmental and Resource Economists The continuing premise for the book is that estimates of the economic values of environmental and natural resource services are essential for effective policy making As previous editions the third edition which includes two additional co authors presents a comprehensive treatment of the theory and methods involved in estimating environmental benefits Researchers policy makers and practitioners will welcome the work as an up to date reference on recent developments Students will gain a better understanding of the contribution that economics as a discipline can make to decisions concerning pollution control and human health recreation environmental amenities and other critical issues concerning the way we use and interact with environmental and natural resource systems To reflect recent progress in both the theory and practice of non market valuation the third edition includes more details on empirical approaches to measurement expanded discussion of the reasons for divergence between willingness to pay and willingness to

accept compensation and increased coverage of econometric issues encountered in estimation In keeping with its cutting edge orientation it also includes more discussion of survey design equilibrium sorting models and the implications of behavioral economics for welfare measurements and benefit cost analysis Handbook of Production Economics Subhash C. Marine Ecosystem Vere Shannon, Gotthilf Hempel, Coleen Moloney, John D. Woods, Paola Malanotte-Rizzoli, 2006-08-17 This is a book which examines much of what we know and also what we don't know about the Benguela Current Large Marine Ecosystem and its inherent variability Building on recent work and exciting findings about the predictability of the Benguela and other coastal upwelling ecosystems the book takes a look towards the future and highlights the difficulty of making predictions in such a complex and variable region The book illustrates what scientists and managers from developed and developing countries can achieve by working together and it lays a solid base upon which to build wise management and ensure sustainable use of the ecosystem Essential reading and a valuable reference work on the Benguela Current Large Marine Ecosystem Covers what we know about variability in the Benguela and its impacts Provides information on forecasting in the Benguela and offers insight in what is predictable and what is not Discusses key elements of a future integrated observing and forecasting system Capitalizing on Nature Edward B. Barbier, 2011-09-08 The basic unit of nature the ecosystem is a special form of wealth which we can think of as a stock of natural capital However perhaps because this capital is free we have tended to view it as limitless abundant and always available for our use exploitation and conversion Capitalizing on Nature shows how modeling ecosystems as natural capital can help us to analyze the economic behavior that has led to the overuse of so much ecological wealth It explains how this concept of ecosystem as natural capital sheds light on a number of important issues including landscape conversion ecological restoration ecosystem resilience and collapse spatial benefits and payments for ecosystem services The book concludes by focusing on major policy challenges that need to be overcome in order to avert the worsening problem of ecological scarcity and how we can fund novel financing mechanisms for global conservation *Special Issue: The Economics of Non-convex Ecosystems* Partha Dasgupta, 2003

Handbook on the Economics of Natural Resources Robert Halvorsen, David F. Layton, 2015-02-27 The topics discussed in the Handbook on the Economics of Natural Resources are essential for those looking to understand how best to use and conserve the resources that form the foundation for human well being These include nonrenewable resources mod

Biodiversity Economics Andreas Kontoleon,Unai Pascual,Timothy Swanson,2007-12-13 Human induced biodiversity loss is greater now than at any time in human history with extinctions occurring at rates hundreds of times higher than background extinction levels The field of biodiversity economics analyses the socio economic causes of and solutions to

biodiversity loss by combining the disciplines of economics ecology and biology This field has shown a remarkable degree of transformation over the past four decades and now incorporates the analysis of the entire diversity of biological resources within the living world Biodiversity Economics presents a series of papers that show how bio economic analysis can be applied to the examination and evaluation of the problem of various forms of biodiversity loss Containing insightful bio economic research by some of prominent practitioners in the field this volume will be an essential research tool to those working on biodiversity issues in the academic policy and private sectors

Implementing Environmental Accounts Rashid M. Hassan, Eric D. Mungatana, 2012-12-02 Leaving aside human and social capital for a future volume the book should be viewed as a crucial first step in developing indicators for total wealth in the countries covered by the case studies which include Kenya Uganda Tanzania Ethiopia Mozambique and South Africa These case studies experiment with implementing the SEAA in sub Saharan nations known to suffer from the resource curse their wealth in resources and commodities has allowed inflows of liquidity yet this cash has not funded crucial developments in infrastructure or education What's more resource driven economies are highly vulnerable to commodity price mutability The new measures of wealth deployed here offer more hope for the future in these countries than they themselves would once have allowed for

Essays on Pollution Control in Economics and Management Science Fouad El Ouardighi, 2025-04-25 The book features contributions that address both environmental economics and environmental management It presents a novel dynamic modeling framework for environmental economics in which environmental absorption efficiency is considered as a time dependent variable with its own dynamics It also introduces several extensions and applications of the model including the possibility of including self regenerating environmental absorption efficiency non cooperative transboundary issues with two superimposed free rider behaviors i.e emissions reduction and restoration efforts and deforestation In the environmental management context it puts forward an entirely new dynamic modeling framework Unlike static approaches the model considers both flow and stock variables reflecting the accumulation of pollution over time In turn the book assesses sustainable configurations for supply chain competition providing mathematical insights and managerial recommendations that integrate accumulated pollution aspects and associated negative externalities Overall the book calls for combining environmental economics and environmental management in order to arrive at more realistic empirically grounded models Given its focus the book offers a valuable resource for researchers and graduate students with an interest in addressing pollution control challenges in the fields of economics and management science

Handbook of Environmental Economics Karl-Göran Mäler, Jeffrey R. Vincent, 2003 The Handbook of Environmental Economics focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a microeconomic institutional standpoint Its perspective is dynamic including a consideration of the dynamics of natural systems and global with attention paid to issues in both rich and poor nations In addition to chapters on well established topics such as the

theory and practice of pollution regulation it includes chapters on new areas of environmental economics research related to common property management regimes population and poverty mechanism design political economy of regulation experimental evaluations of policy instruments and technological change Handbook of Environmental Economics

Karl-Goran Maler, Jeffrey R. Vincent, 2005-12-09 Much applied environmental economics is concerned with the valuation of changes in environmental quality Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods It also includes cross cutting chapters that deal with aspects of welfare theory uncertainty experimental methods and public health that are pertinent to valuation Throughout the volume attention is paid to research and policy issues that arise not only in high income countries where most of the theory and econometrics that underlie applied valuation methods have been developed but also in poorer parts of the world The volume provides a state of the art reference for scholars and practitioners alike Handbook of Computational Economics

Leigh Tesfatsion, Kenneth L. Judd, 2006-05-15 The explosive growth in computational power over the past several decades offers new tools and opportunities for economists This handbook volume surveys recent research on Agent based Computational Economics ACE the computational study of economic processes modeled as dynamic systems of interacting agents Empirical referents for agents in ACE models can range from individuals or social groups with learning capabilities to physical world features with no cognitive function Topics covered include learning empirical validation network economics social dynamics financial markets innovation and technological change organizations market design automated markets and trading agents political economy social ecological systems computational laboratory development and general methodological issues Every volume contains contributions from leading researchers Each Handbook presents an accurate self contained survey of a particular topic The series provides comprehensive and accessible surveys
