Report of the American Assembly Economic Issues and the President: 1980 and Beyond , *The President And The Council Of Economic Advisors* Erwin C Hargrove, Samuel A Morley, 2019-07-11 Interviews with ten former chairmen of the Council of Economic Advisers from the Truman to the Carter administrations are gathered in this book to examine the relationship between economic advisers and the president and the institutional relationships among the CEA executive departments and federal financial agencies The interviews also reconstruct major presidential decisions since the establishment of the CEA such as the 1964 tax cut the 1971 wage and price freeze and presidential strategies for managing inflation and recession In a preface to each interview the editors analyze the conditions for CEA effectiveness look at how well the advice of the Council has conformed to the presidential world view and pinpoint the distribution of responsibility for policy analysis and advice within successive administrations *The Quality of American Life in the Eighties* United States. Panel on the Quality of American Life, 1980 *Housing and Planning References* United States. Department of Housing and Urban Development. Library, 1981 *The Economy and the President* Walter Evans Hoadley, 1980 At head of title The American Assembly Columbia University Background papers edited by W E Hoadley prepared for the American Assembly held Mar 6 8 1980 at the Center for Study of the American Experience Includes index *Science & Engineering Education for the 1980's & Beyond* National Science Foundation (U.S.), 1980 *The Politics of Inflation and Economic Stagnation* Leon Lindberg, Charles S. Maier, 1985-06-01 The inflation of the 1970s represented the greatest peacetime disruption of the Western economies since the Depression Even as inflation receded the recession in its wake brought more joblessness than at any time since the 1930s The governments of industrialized nations found that the economic policies they had developed since World War II no longer assured price stability or high employment What are the lessons of over a decade of economic difficulty In this conference volume which focuses on aspects of the crisis that economists often presuppose to be beyond control the authors analyze the political and social underpinning of inflation and recession Part 1 places the economic problems of the 1970s in the historical context of postwar development and then compares economic and political science analyses of inflation Part 2 examines how rivalries between social groups affect inflationary processes One chapter draws on the history of Latin American inflation to suggest the conflicts in play Two others weigh the role of labor and industry in the formation of economic policy And another shows how rivalry between countries like rivalry between classes at home permitted inflation to rise The chapters in part 3 contest the claim that big government or big labor causes inflation Two studies emphasize that a high degree of public expenditure does not itself lead to inflation Further contributions explore the role of central banks and subject such concepts as the political business cycle to critical analysis Part 4 comprises case studies about macroeconomic policymaking in four nations Italy Germany Japan and Sweden The studies reveal what institutional attributes rendered those countries resistant to inflation or vulnerable to economic setback In the last part the

editors pull together the findings and lay out the contemporary political feasibility of alternative approaches to macroeconomic management
