Leichman, 2015-12-03 Acting concentrated both the aspirations and anxieties of seventeenth and eighteenth century France where theater was a defining element of urban sociability In Acting Up Staging the Subject in Enlightenment France Jeffrey M Leichman argues for a new understanding of the relationship between performance and self Innovative

interpretations of La Chaussée, Rousseau, Diderot, Ruffin, Beaumarchais and others demonstrate how the figure of the actor threatened ancien régime moral hierarchies by decoupling affect from emotion. As acting came to be understood as an embodied practice of individual freedom, attempts to alternately perfect and repress it proliferated. Across religious diatribes and sentimental comedies, technical manuals and epistolary novels, Leachman traces the development of early modern acting theories that define the aesthetics, philosophy and politics of the performed subject. *Acting Up* weaves together cultural studies, literary analysis, theater history and performance studies to establish acting as a key conceptual model for the subject for the Enlightenment and for our own time.
