Cats in Australia Chris Dickman,John Woinarski,Sarah Legge,2019-06-01 Across the world cats are loved as pets or are kept or tolerated for their role in controlling some animal pests But cats both pets and feral also kill many native animals and this toll can be enormous Cats have been remarkably successful in Australia spreading pervasively across the continent and many islands occurring in all environments and proving to be adept and adaptable hunters A large proportion of Australia s distinctive fauna is threatened and recent research highlights the significant role that cats play in the decline and extinction of native species Cats in Australia brings this research together documenting the extent to which cats have subverted and are continuing to subvert Australia s biodiversity But the book does much more than spotlight the impacts of cats on Australian nature It describes the origins of cats and their global spread their long standing and varying relationship with people their global impacts and their ecology It also seeks to describe the challenge of managing cats and the options available to constrain their impacts

Annual Report 1969 , Neris and India's Idiot-Proof Diet Neris Thomas,India Knight,2008-12-14 Ever hankered for a diet book by and for real people people who you know actually have a life Congratulations you ve just picked it up Before we began our diet Neris and I weighted 434 pounds between us Our goal was to lose 140 pounds between us in under a year to go from a size 22 to a size 14 And we did it If two unusually greedy cocktail loving moms can lose this amount of weight without much effort so can anyone This book tells you how two friends did it and how you can do it too It s not a diet devised by some bossy string bean who has never been more than 7 pounds overweight nor by a fat middle aged doctor but a real long term workable diet for real people A modified and therefore bearable low carb high protein way of eating the diet really works and includes meal plans recipes advice on clothes make up and hair at every stage from fat to thin It doesn t include impossible exercise routines or disgusting things to eat Above all it gets to the bottom of why we overeat and shows you how to stop There s never been a diet book like it for women by women with jokes and useful tips and advice that is truly simple to follow What other diet book tells you to pour yourself a large drink at the end of the day because you ve earned it You ll laugh out loud Reading this book is like talking to

a clued up friend who also makes you feel great about yourself amazingly frank the honesty of their confessions exceed anything previously published The Evening Standard

Dietary quality and nutrition in Myanmar: Past progress, current and future challenges Mahrt, Kristi,Headey, Derek D.,Ecker, Olivier,Comstock, Andrew R.,Tauseef, Salauddin,2023-02-17 In the decade prior to the COVID 19 pandemic Myanmar was in the midst of a dietary transition driven by rapid economic growth and urbanization In this study we first use national survey data to compare household diets in 2015 to the healthy diet recommendations of food based dietary guidelines adapted for Myanmar as well as estimated nutrient consumption relative to recommended intakes We use these food group and nutrient consumption gaps to estimate a new measure of multidimensional dietary deprivation developed by Pauw et al 2022 and a novel extension of that index to nutrient deprivation Both deprivation indices are strongly negatively correlated with total household expenditure We then use food demand estimation to estimate income and own price elasticities which reveal strong preferences for animal sourced foods but weaker preferences for vegetables and pulses Expenditure data also point to strong demand for oils fats a problem observed throughout developing Asia Pingali and Abraham 2022 and for food away from home which partially explains the rising burden of overweight obesity in Myanmar Moreover since most nutrient dense foods are income and price elastic estimated income elasticities suggest that recent declines in household income and increases in food prices in

Myanmar will result in declining dietary diversity We show that this is indeed the case utilizing household phone surveys conducted in recent years We first use a food vendor survey to show that the cost of a healthy diet increased by 61 percent between September 2021 and September 2022 Next we analyze a rural Dry Zone panel survey implemented 10 times over 2020 2021 and find that maternal and child dietary diversity both declined significantly as Myanmar's economic situation deteriorated Then in a nationally representative phone survey conducted quarterly in 2022 over a period of rapid food inflation we find further deterioration in diet quality among adults but no deterioration among children 6-23 months of age suggesting parents may be trying to insulate their children from the worst effects of the crisis Finally we conclude the paper by discussing policy and program options in very difficult political circumstances Malnutrition is a multidimensional problem requiring multisectoral solutions but at present the breakdown in the provision of even basic services makes significant progress highly unlikely and reversing the recent deterioration in dietary quality and nutrition will surely require resolution of Myanmar's political crisis In the interim we discuss three potentially effective types of interventions 1 rice fortification to reduce micronutrient deficiencies 2 homestead food production to improve dietary quality in farm households and rural and peri urban communities and 3 nutrition sensitive social protection for vulnerable mothers and young children with transfers ideally accompanied by nutrition education interventions
