Wesolowski, Arnie H. Zencius, 2014-01-15      **A Practical Guide to Head Injury Rehabilitation** Michael D. Wesolowski, Arnie H. Zencius, 2013-06-29 Behavioral neuropsychology presents at once a challenge and an opportunity for the field of behavior analysis A great diversity of problem areas including education classroom management child rearing retardation and industry have been treated effectively by the behavior analytic approach which has traditionally and quite deliberately chosen to deemphasize physiology and cognitive variables Yet brain injury by its nature entails neurological insult that is often closely related to specific cognitive dysfunctions The challenge for behavior analysis is to develop effective treatments for a disorder with such clearly defined tripartite characteristics The opportunity exists for behavior analysis to expand its conceptual basis as well as to provide benefits to patients otherwise despairing of assistance Case histories demonstrate over 20 years of successful applications of behavior analysis to brain injured individuals indicating that some applications are possible but are these reports notable exceptions or the harbingers of a new general therapeutic approach The present book describes an overall focused behavioral program for dealing with the diversity of brain injury problems in a general brain injury rehabilitation setting The authors describe what types of neurological damage are associated with specific types of cognitive emotional dysfunction and in turn with specific types of behavioral dysfunction thereby demonstrating how the choice of behavioral treatment is guided by the neurological and subjective assessment The result is a conceptually unified approach The distinctive value of this book lies in the detail as well as the programmatic guidelines for actual implementation of this behavioral approach      **Practical Management of Head and Neck Injury**
