TWO WORLDS is the multigenerational story of a Jewish family. It takes us from mid nineteenth century villages in Hungary during the Austro Hungarian Empire to cosmopolitan Budapest before during and after World War II and finally to post war New York City. It is also the story of a culture that transformed from tolerant to virulently intolerant in a single generation. Kati's father served as an officer in the Hungarian army during WWI but was deported and killed during WWII. Sensing the coming disaster Kati went to England to give birth to her first child hoping that a British birth certificate would protect him against anti-Semitism. She returned to Budapest to be with her ailing parents, survived the war and its aftermath with her husband and two sons, and found a way to immigrate to New York to be near her brother Gabor Carelli who became a principal soloist at the Metropolitan Opera Company. In her new world she built on her sewing skills to become an assistant dress designer of high end bridal gowns in the then vigorous New York garment industry and later a pattern maker at Simplicity Patterns. Augmenting Kati's story is a large selection of family photographs and official documents many in color dating back to the mid nineteenth century which remarkably survived the war and emigration in excellent condition. Also included are several color maps indicating places mentioned in the text, family trees and footnotes about historical and geographical details.

Middle Range Theory for Nursing Mary Jane Smith, Patricia R. Liehr, 2013-05-15. Awarded first place in the 2013 AJN Book of the Year Awards in the Nursing Research category. This is an outstanding edition of this book. It has great relevance for learning about developing and using middle range theories. It is very user friendly yet scholarly. Score 90.4 Stars. Doody's Medical Reviews. Middle range theory has become a vital staple of nursing education and application to research. These theories which lie between the working hypotheses derived from day to day research and the larger systemic efforts to develop unified theories cover the scientific underpinnings that guide nursing practice and research. This third edition of a two time AJN Book of the Year Award winner contains two new theories including self reliance theory and transitions theory. It revises and updates all other content and provides ladders of abstraction for each theory to guide students in their appropriate use. This highly accessible book integrates nursing theory with well defined practice areas, identifies purpose and basic concepts, foundational literature, relationships among concepts and use in practice. Chapters are organized by central theories, each of which is covered in depth. Comprehensive bibliographies at the end of each chapter facilitate more in depth research. The book remains an essential text for theory and research courses in master's and doctoral nursing programs. New to the Third Edition: Presents two new theories: self reliance theory and transitions theory. Deletes two theories no longer in use: community empowerment and family stress adaptation. Updates and revises all other content from the second edition. Guides students in appropriate use of theory per level of complexity.

When Doctors Get Sick H.N. Mandell, H.M. Spiro, 2013-11-11. When a doctor gets sick his status changes. No longer is his role defined as deriving from doctor i.e. learned but as from patients the present participle of the deponent verb *patior* i.e. to suffer with all the passive acceptance of pain the verb implies. From *pass* us the past participle we get the word *passion* with its wide gamut of

emotional allusions ranging from animal lust to the sufferings of martyrs It is the connotation not the denotation of the word that defines the change of status When a doctor is sick enough to be admitted to a hospital he can no longer write orders orders are written about him removing him from control of his own situation One recalls a sonnet from W H Auden s sequence The Quest which closes with the lines Unluckily they were their situation One should not give a prisoner medicine A conjuror fine apparatus Nor a rifle to a melancholic bore That is a reasonable expression of twentieth century skepticism and rationalism Almost all medical literature is written from the doctor s point of view Only a few medically trained writers one thinks of Chekhov s Ward Six manage to incorporate the patient s response to his situation Patients voices were not much in evidence until well into the twentieth century but an early example is John Donne s Devotions upon Emergent Occasions 1624
