

Health and Safety Law

What you need to know

All workers have a right to work in places where risks to their health and safety are properly controlled. Health and safety is about stopping you getting hurt at work or ill through work. Your employer is responsible for health and safety, but you must help.

What employers must do for you

- 1 Provide what could harm you in your job and the precautions to stop it. This is part of risk assessment.
- 2 As a way you can understand, employ how risks will be controlled, and tell you when it is impossible for this.
- 3 Consult and work with you and your health and safety representatives or providing someone from home in the workplace.
- 4 Free of charge, give you the health and safety training you need to do your job.
- 5 Free of charge, provide you with any equipment and protection (clothing you wear), and ensure it is properly looked after.

- 6 Provide safety, working facilities and working areas.
- 7 Provide adequate first aid facilities.
- 8 Report injuries, illnesses and dangerous incidents at work to our Incident Contact Centres
0845 300 9923
- 9 Have measures that prevent you or your colleagues from getting hurt or ill through work. Examples of hazards or dangerous work at the relevant assessment could be where you can easily reach it.
- 10 Work with any other employers or contractors sharing the workplace or providing equipment (such as access equipment), so that everyone's health and safety is protected.

What you must do

- 1 Follow the training you have received when using any work where your employer has given you.
- 2 Take reasonable care of your own and other people's health and safety.
- 3 Co-operate with your employer on health and safety.
- 4 Tell someone (your employer, supervisor, or health and safety representative) if you think the work or equipment provided is putting someone's health and safety at serious risk.

If there's a problem

- 1 If you are worried about health and safety in your workplace, talk to your employer, supervisor, or health and safety representative.
- 2 You can also talk to our helpline for general information about health and safety at work.
- 3 If, after talking with your employer, you are still worried, please see below. We can get you in touch with the local enforcing authority for health and safety and the Employment Medical Advisory Service. You don't have to give your name.

modelling metabolism with mathematica pdf free download - May 03 2022

we chose mathematica because of its huge suite of mathematical functions that can be implemented by simple one line commands for its symbolic computational power and for the large number of other texts that can be used by a student to gain proficiency in the language and to glean ideas for metabolic modelling

parameter estimation 9 modelling metabolism with - Jan 11 2023

models of real cellular systems can become extremely complicated when constructed in this way for example the model of the red blood cell described in chapter 7 contains 60 state variables metabolites and 270 parameters such systems are often said to be overparameterized with respect to the available experimental data
