Health And Wealth An International Study Of Health Care Spending:

Health and Wealth Robert J. Maxwell, 1981 Australien canada frankrig brd italien holland sverige schweiz storbritannien usa There has long been a need for a book which documents and analyses health care expenditure. The study defines four faces of health care spending: sources of finance, control of health care delivery, manpower and supplies, and services provided. The numerous figures and tables will be of great value to statisticians but many interesting facts emerge which make the book a great deal more than a statistical chronicle. For instance, the quality of health care in each country is analysed, proving that high expenditure does not in itself guarantee a totally adequate health level. Financing Universal Access To Healthcare: A Comparative Review Of Landmark Legislative Health Reforms In The Oecd Alexander S Preker, 2018-03-20. The recent expansion of health insurance coverage in the USA under the Affordable Health Care Act and current threats to reverse the benefits of this reform have once again focused the world's attention on the difficult challenges faced by other countries trying to provide better access to healthcare to their population at an affordable cost. This textbook provides a comparative review of financing universal access to healthcare in the Organisation for Economic Co-operation and Development OECD countries. The first two chapters of the book provide a framework for financing universal access to healthcare. The remaining eight chapters present case studies of eight OECD countries that have successfully introduced reforms to finance universal access to healthcare for their population through landmark legislative reforms. A concluding chapter focuses on the lessons learned from the OECD and recommendations from policymakers and others who are planning similar reforms. The book is designed as a learning tool for students and as a user guide for policymakers. **Health Care Provision** Audrey Leathard, 2000. The key NHS reforms are charted across time and the changes brought about under New Labour are reviewed. **Justice and Health Care** Allen Buchanan, 2009-11-05. This volume brings together ten essays that have been published over a period of more than two decades in a wide range of venues and arranges them in such a way as to demonstrate the systematic progression of the author's thinking. This volume bridges the disciplinary chasm between Bioethics and Political Philosophy. *Health Care and Cost Containment in the European Union* Elias Mossialos, Julian Le Grand, 2019-05-20. First published in 1999, this volume aims to describe and analyse the experience of cost containment in Europe over the last fifteen years in order to understand that experience and to determine as best we can which methods were successful and which were not. Part I provides an overview of healthcare in the European Union, an overview of recent expenditure trends. Part II complements the first, examining in detail cost containment policies in each EU Member State. The country-based chapters refer to developments up to mid 1997. *Health Care Financing Review*, 1989. Constraining National Health Care Expenditures United States.
