Health Care Marketplace:

The Health Care Marketplace Warren Greenberg, 2012-12-06 This book is an economist's view of the health care marketplace. It examines the incentives of physicians, patients, firms, and the role of government in the health care sector in a world of limited resources. Several themes run through this book. First, health care is a business. To an economist, this means that firms maximize profits. Perhaps this is not always so, but I have yet to see a better theory of how health care firms behave. The health care industry therefore is not much different in economic terms from other industries. At one time, economists pointed to the asymmetry of information between the physician provider and the patient as one difference between health care and other industries. Physicians often know a great deal about treating an illness while the patient knows little or nothing. But the movement toward managed care in the United States has partially closed the information gap, although perhaps creating other problems. Indeed, the advent of managed care has propelled health care into a business. Information is another theme of the book.

Reforming the Health Care Market David F. Drake, 1994-09-19 Examining the health care market in a historical framework, Drake analyzes the forces and events that have shaped American health care in the twentieth century and sheds new light on why and how our health care system has dampened competitive market forces and failed to provide sound value for much of our health care expenditures. He examines the roles that physicians, hospitals, insurance companies, businesses, individual consumers, and government legislation have played in creating a provider-dominated market in which the cost of care has been concealed from consumers. Comparing U.S. health care expenditures with those of other developed countries, he concludes that a significant part of our health care problem is the style of medicine practiced in the United States, which is much more specialized and high-tech than in other developed nations. Drake develops proposals for health care financing reform that consider the political and economic difficulties involved. He first examines the Clinton health care reform plan and makes specific recommendations for revisions that would improve its likelihood of controlling costs. He then offers an alternative proposal that would both maintain the principle of universal noncancelable coverage and eliminate the flaws in the market for health care services by giving consumers a financial stake in cost containment. This timely argument, combining economic and historical analysis with thoughtful consideration of the motivating humanitarian and political concerns, will be of interest to everyone seeking to understand and to reform our ailing health care system.

Can a Health Care Market Be Moral? Mary J.

McDonough, 2007-06-08 Since the 1970s health care costs in the United States have doubled insurance premiums have far outpaced inflation and the numbers of the uninsured and underinsured are increasing at an alarming rate At the same time the public expects better health care and access to the latest treatment technologies Governments desperate to contain ballooning costs often see a market based approach to health care as the solution critics of market systems argue that government regulation is necessary to secure accessible care for all The Catholic Church generally questions the market's ability to satisfy the many human needs intrinsic to any care delivery system yet although the Church views health care as a basic human right it has yet to offer strategies for how such a right can be guaranteed Mary J McDonough a former Legal Aid lawyer for medical cases understands the advantages and disadvantages of market based care and offers insight and solutions in Can a Health Care Market Be Moral Drawing on Catholic social teachings from St Augustine to Pope John Paul II McDonough reviews health system successes and failures from around the world and assesses market approaches to health care as proposed by leading economists such as Milton Friedman Regina Herzlinger Mark Pauly and Alain Enthoven Balancing aspects of these proposals with Daniel Callahan's value dimension approach McDonough offers a Catholic vision of health care in the United States that allows for some market mechanisms while promoting justice and concern for the least advantaged
